

Rain Defense fence plan
8' high chain link fence with plastic 75% wind load slats.
Minimum 6' on center posts.
Foundation 3' deep with 1' diameter hole filled with concrete.
Most of the posts will be where previous posts were.
2-20' manual sliding gates
1-4' manual swing-out man gate
98' of existing I-beam fence will remain; previous fence posts were welded to the inside of the I-beams. A few posts may be welded in the same manner, about 4'.
