c. SUBROGATION WAIVER:

Any other insurance held by an additional insured shall not be required to contribute anything toward any loss or expense covered by the insurance provided by this policy. The insurance limits required by the City are not represented as being sufficient to protect Provider. 11. CONFLICT OF INTEREST:

Provider warrants that it is not a conflict of interest for Provider to perform the services required by this Agreement. The City Manager or their designee may consent or reject such request in their sole and absolute discretion. Any attempt to do so without said consent shall be null and void, and any assignee, sublessee, hypothecate or transferee shall acquire no right or interest by reason of such attempted assignment, hypothecation or transfer. Subject: Estuary Park Improvements – Phase 2 Development
 Construction Documents Scope
 Verde Design Project No.: 2121200

In response to your request, Verde Design, Inc. is pleased to submit the following proposal to provide the identified design services on the above mentioned project. This proposal shall remain valid for a period of sixty (60) days.

PROJECT UNDERSTANDING/HISTORY:

The City of Alameda (City) is requesting a proposal for design services for the phase 2 re-design of the Estuary Park Athletic Field Complex. Phase 1 has already been completed and the conform set dated 06-14-16 will be used as the starting point for phase 2. The phase 2 re-design includes:

- Parking lot revisions, including EV charging stations.
- Reduction of basketball courts to one (1) half-court.
- Shade structure modification.
- Addition of a Bankshot court.
- Addition of four (4) pickleball courts.
- One (1) restroom for the entire park to be placed in phase 2. The restroom in phase 1 was not installed.
- Additional planting areas.
- Coordination with the recent Mitchell Road improvements and connection to the park.

Verde Design proposes a design process to include start-up and 30% schematic design, 95% submittal and 100% construction documents. This proposal excludes bidding and construction support which are provided in a separate proposal. Plans will be developed as one increment and as a single bid package.

Starting with a review of the conform set, we will review the proposed and re-designed improvements and programs, so they conform with current office standards and site materials selection. A site walk with City staff will occur to review program needs and possible site constraints. We will prepare a site survey of the phase 2 area as existing conditions have changed due to soil stockpiling and phase 1 construction since the site was last surveyed in 2014.

The playground and Bankshot equipment is being designed by the City and we will review the layout and design. Our plans provide the play area edge, seat walls, subgrade preparation/grading, and drainage. City to provide layout, finish grading, and play surface detailing. Coordination of the contractor work and City efforts will be outlined in the plans. Contractor will purchase and install equipment as part of the contract.

After the start-up phase, we will develop the schematic design package. The plans were previously prepared for phase 2 but there are revisions to the design and building code updates. We plan to update the designs based on

the new elements being added, update the plans, remove the phase 1 elements not related to the phase 2 improvements, meet with staff halfway through this process to review the progress and verify questions on the design and engineering. We will setup a systems design for the grading, drainage, material, and electrical for the proposed improvements and site work for discussion and review at the meeting. We plan to present insights so that direction can be provided to complete the design and final 30% schematic design submittal.

The City is planning to provide a community process and facilitate the input. Verde Design will provide an updated version of the phase two improvements and updates with a rendered plan for the community meetings. We will not be attending the meetings but will receive input from them.

Following the approval of the schematic design package, we will move forward with 95% construction documents. We will review the package with staff and coordinate comments. Building department review will occur at this submittal. The next submittal will be the final bid submittal for a final review, design coordination and building department approval. City specifications, bidding documents and standards will be incorporated. A bid set of plans will be prepared for bidding.

Included are services for storm water treatment alignment for the impervious surfacing being changed. We may need to add or modify the drainage system for the proposed changes and storm water requirements. Storm water calculations and coordination with the City engineers will occur to align the plans with the City's stormwater requirements. We will work with the City to develop a post construction storm water management plan for maintenance of those systems.

An erosion control plan and SWPP will be provided and revised. Inspection services or QSP services will be provided by the contractor.

Our team includes Salas O'Brien for architecture programming with the prefabricated building and electrical engineering. Lighting for the site will include the parking lot, pathway lighting, pickle ball courts and conduit installed for the Bankshot and basketball. AKH Engineers will provide the structural design. Underwood & Rosenblum will provide the survey. Cleary Consultants are included for geotechnical coordination and any updates from their last report/amendments as an optional service

Public Restroom Company is included to provide a larger restroom building than previously shown in the phase 2 area. This restroom will be setup to accommodate all of the needs of the park. We will work with Public Restroom Company on the layout, materials and components of the building and they will generate engineered plans for building department review and alignment with phase 2 park plans.

Included are seven meetings with the City staff during the construction documents phases.

Our timeline is proposed below. A preliminary cost estimate, based on the above changes, was \$5.9 million. The cost estimate will be reviewed and updated during our submittals.
