To the Alameda Traffic Commision -

The roadway of Buena Vista Ave between Wilma Chan Way and Sherman St is absolutely unsafe.

There are no stop (or slow) signs for eight (8) long blocks, although there are numerous places where people need to cross. There are ZERO 25mph signs going in the westbound direction on this span of the street.

Cars are going so fast on this street that they PASS cars in the oncoming lane of traffic.

This situation needs to be addressed immediately! There are children, people and pets crossing in danger numerous times a day. Currently, the most dangerous intersections are 9th and Buena Vista, and Wood St and Buena Vista. Chapin and Buena Vista is also a place where people are trying (unsuccessfully!) to cross the street safely.

A number of neighbors will be attending the Alameda Transportation Commission's meeting on Wednesday, November 20. Please be prepared to address the situation.

Yours sincerely, Lissa Sorenson
