RE: [Item 6-E: Status Report](#) (on last agenda; moved to next meeting)

Brian Fowler
Treasurer

Dear Transportation Commissioners and Staff,

Tim Beloney
Secretary

If you're able to address or discuss any of the following questions regarding various projects in the Status Report at the next meeting, we'd be very appreciative.

Cyndy Johnsen
Board Member

Park and Webster St Striping Update & Concrete Barricades (page 9)
Lots of illegal parking in the bike lanes persists along these streets, creating hazards for people on bikes. Could this issue be agendized for a future Transportation Commission meeting? A better understanding of existing enforcement coverage and needs, data collection and reporting, and whether or not [AB361](#) could be implemented in Alameda are some potential areas of discussion.

Maria Piper
Board Member

Oakland Alameda Estuary Bridge (page 7)
Can a link to the finalized PID be included in this report, and if it's not there yet, can the PID be added to the documents section of estuarybridge.org?

Lucy Gigli
Founder, non-voting

Cross Alameda Trail: Signal and Intersection Improvements, Main St to Wilma Chan Way (page 9)
There's been activity at many of these intersections, but little so far at Wilma Chan. Would you be able to discuss what's planned for that intersection?

Signal and Pedestrian Improvements (for intersections at Santa Clara/Grand, Otis/Willow, Otis/Park, Fernside/San Jose) (page 10)
We've been eagerly anticipating construction of this project since the contract was signed in January. Looks like actual construction is now slated for early fall – is it safe to assume construction will be completed this year?

Jean Sweeney Open Space Park Trail Connectors (page 8)
The Cross Alameda Trail along Clement Ave/Tilden Way project is going through the same process with the Department of Toxic Substances Control, but seems to be making more progress with approvals. Is there a strategy that can be shared with ARPD to help the delayed Connectors project get an ETA for approvals, too?

Trails Maintenance (Construction) (page 10)
Is there any more detail regarding progress on the wooden bridge?

Thank you in advance, and thank you for your service.
