Subject: [EXTERNAL] Clement construction is not ADA compliant ♂
Date: Tuesday, July 16, 2024 8:27:58 AM

Please include as public comment.

--

Please instruct the build teams on Clement to ensure that ADA compliant pedestrian passage is maintained during construction. Currently there are numerous businesses we use that cannot be reached via any ADA pedestrian access due to sidewalk removal. No alternatives are maintained or detours identified.

Conveniently our stroller is exactly the width of a wheelchair, so this is not a hypothetical complaint - we have measured.

--

Similarly, when they rip up bike lanes to add well labeled safe alternatives.

Forcing a child biker into the lane and closing the sidewalk, as is done here, is unsafe, and unacceptable.

--

No response necessary - please fix the build to ensure all road users maintain safe access, and especially ensure that ADA pedestrian access is maintained.
