- Monday, October 8, 10:00 a.m. Blue Angels departure (South Field)

OAK Noise Program History

- For more than 40 years, the Port of Oakland has made continuous efforts to develop a program that minimizes noise on surrounding communities at Oakland International Airport.
- The Airport continues to meet with the cities and community to seek ways to balance all concerns -- noise and other environmental issues, consumer and air carrier demands, economic opportunities, and regional transportation needs -- while maintaining safety as its number one priority. Pilot education has also been, and will continue to be, an important part of the Airport's noise abatement program.

The Airport Noise Office serves as a link between the public and aviation stakeholders.

Efforts to Address Aircraft Noise

- Airport/Community Noise Management Forum
- South Field/North Field Research Group
- Pilot Education
- Community Education
- Land Use Planning
- Quarterly Title 21 Reports to the State

Noise Office Customer Service

- Our greatest priority is to provide a response to phone calls and website submitted complaints in a timely manner.
- We encourage residents to perform their own aircraft noise investigation online using WebTrak or submit an aircraft noise complaint if they still have questions or concerns after their investigation.
- The Noise Management Office reviews all comments and complaints and responds as soon as possible with appropriate and pertinent information.

Noise Office Philosophies and Goals

- Outstanding customer service
- Safety is paramount
- Education is critical
- Quickly respond to inquiries
- Thoroughness
- Proactive outreach
