4.1 Method of Assessment

Pursuant to the Act, all parcels that have special benefit conferred upon them as a result of the maintenance and operation of the improvements must be identified and the proportionate special benefit derived by each identified parcel must be determined in relationship to the entire costs of the maintenance and operation of the improvements. Only parcels that receive direct special benefit are assessed, and each parcel is assessed in proportion to the estimated benefit received.

Zone 7

Assessment Methodology

Each of the subdivided units within Zone 7 is deemed to receive special benefit from the improvements. To determine the annual assessment rate for each unit, the total annual cost of maintenance and administration is divided by the total number of units within the Zone.

$$\text{Total Annual Costs} / \text{Total Number of Units} = \text{Annual Assessment Rate per Unit}$$

Rate Inflator

There is no rate inflator for Zone 7. The maximum rate has historically been \$350.00 per unit.

The following table shows a history of the maximum and actual assessment rates for the past five fiscal years:
