The diagram shows a compass on the left with a vertical needle pointing to the top, which is labeled 'N' for North. To the right of the compass is a graph of a function. The horizontal axis is labeled with values 0, 10, 20, 30, and 50ft. The function is a step function that starts at a high level from 0 to 10ft, drops to a low level from 10 to 20ft, rises back to the high level from 20 to 30ft, and then drops to a level below the low level for the remainder of the path up to 50ft.
