

Otis Elementary School

Good news: A majority of students and families travel to campus each day by active modes.

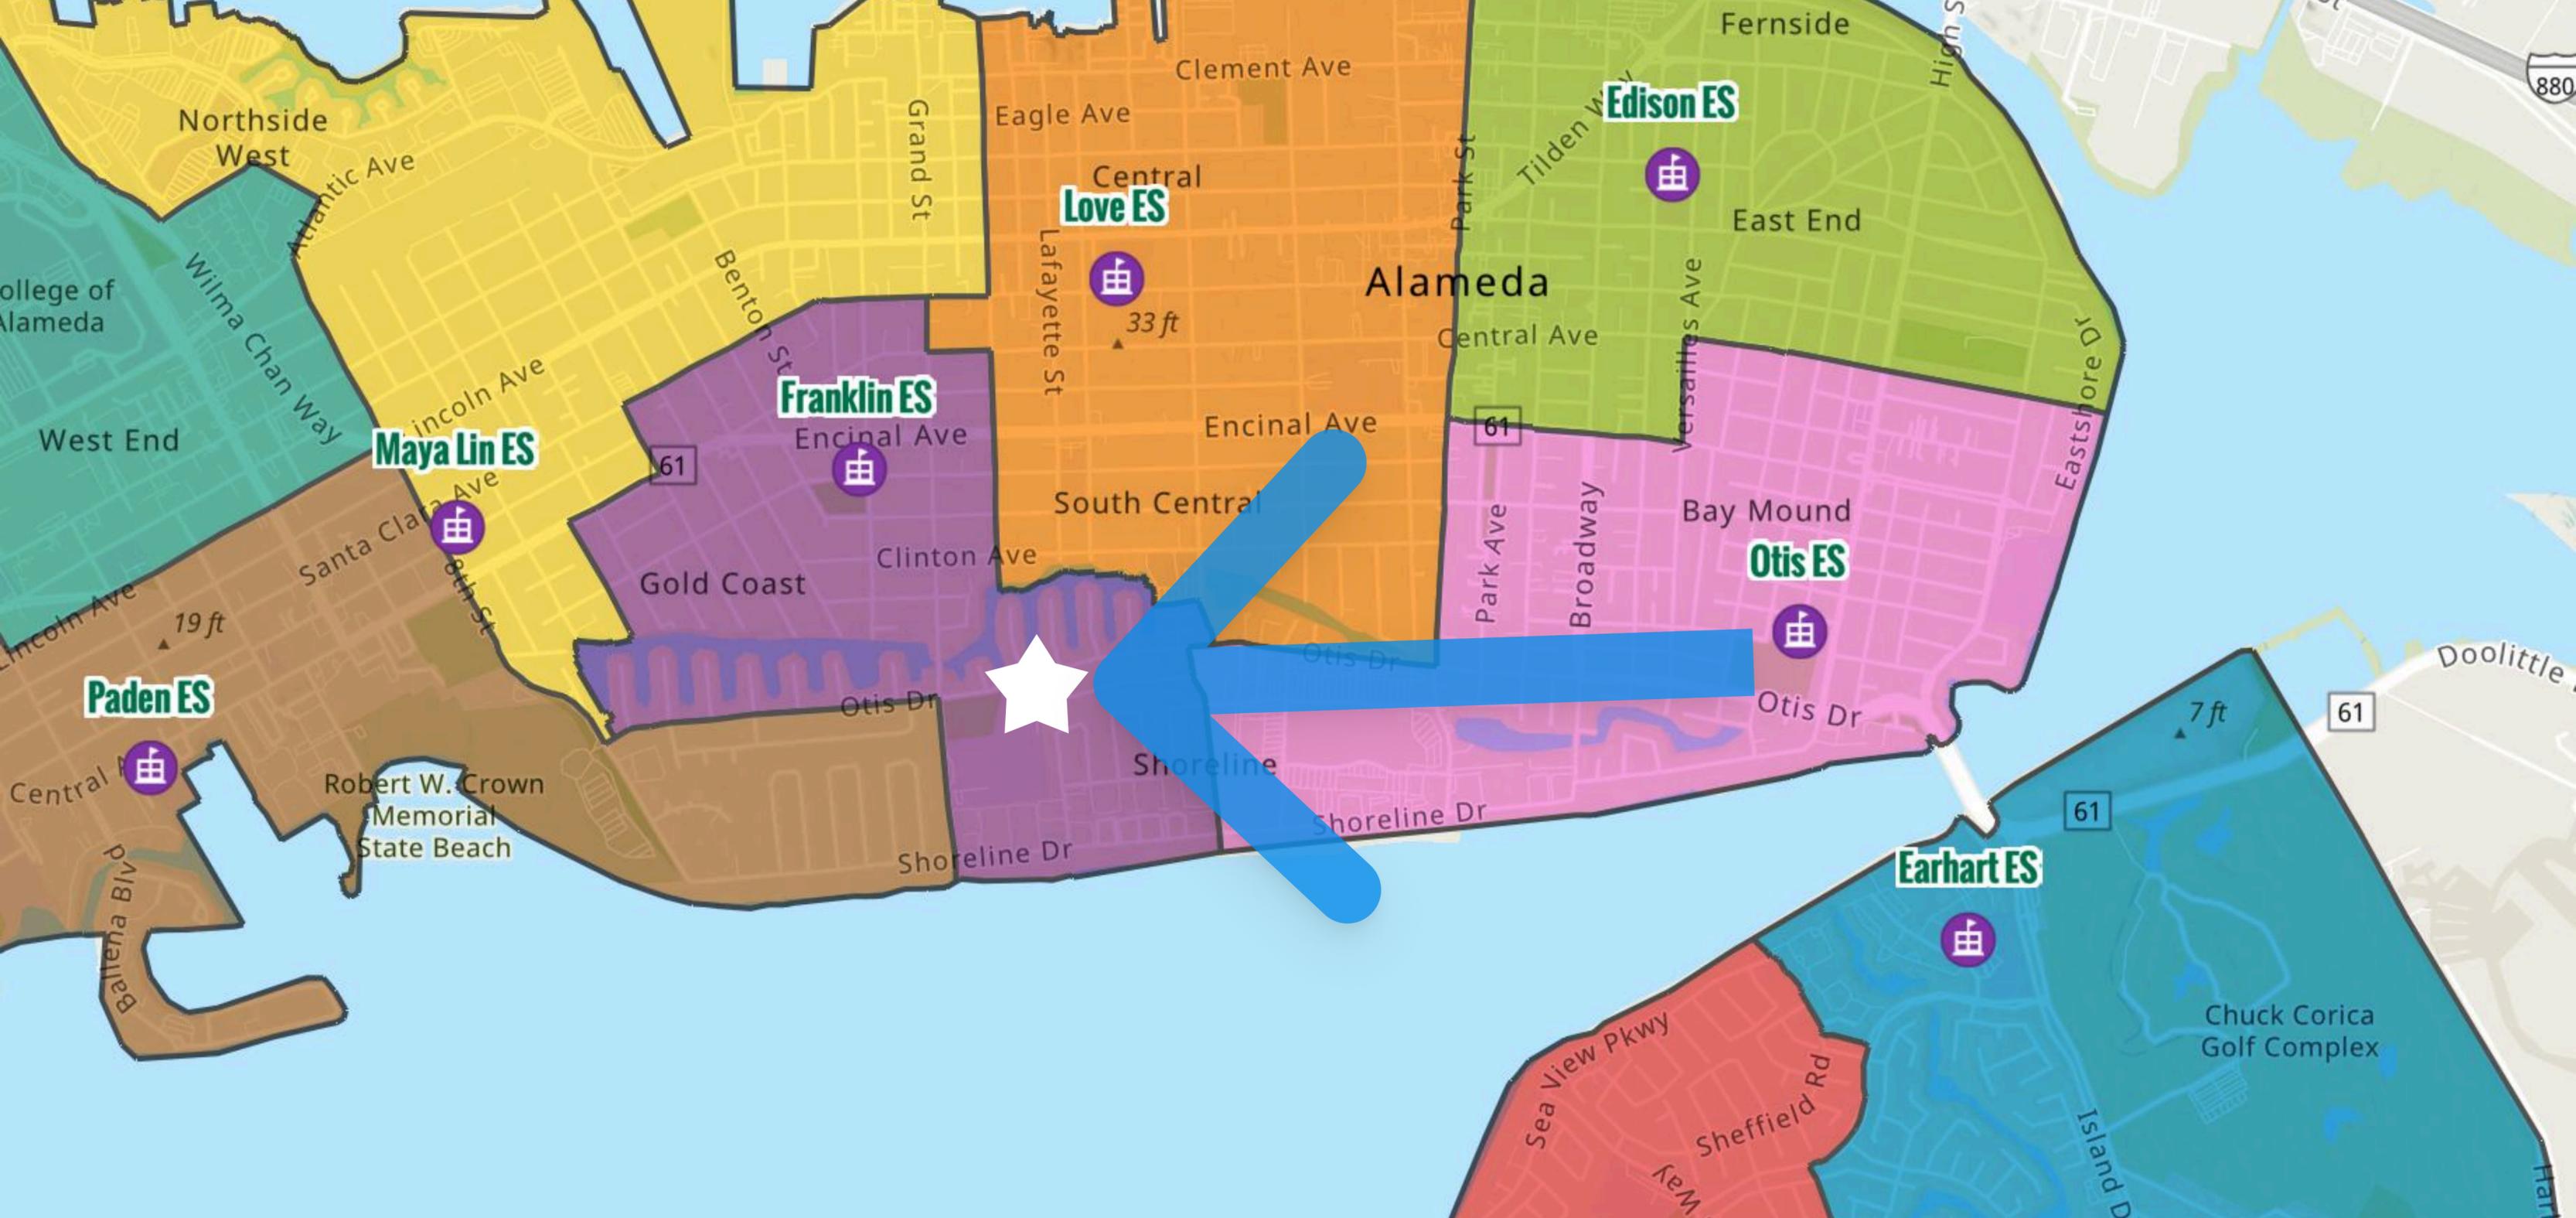

(tallies from Alameda County SR2S program)

Historic Mode Split

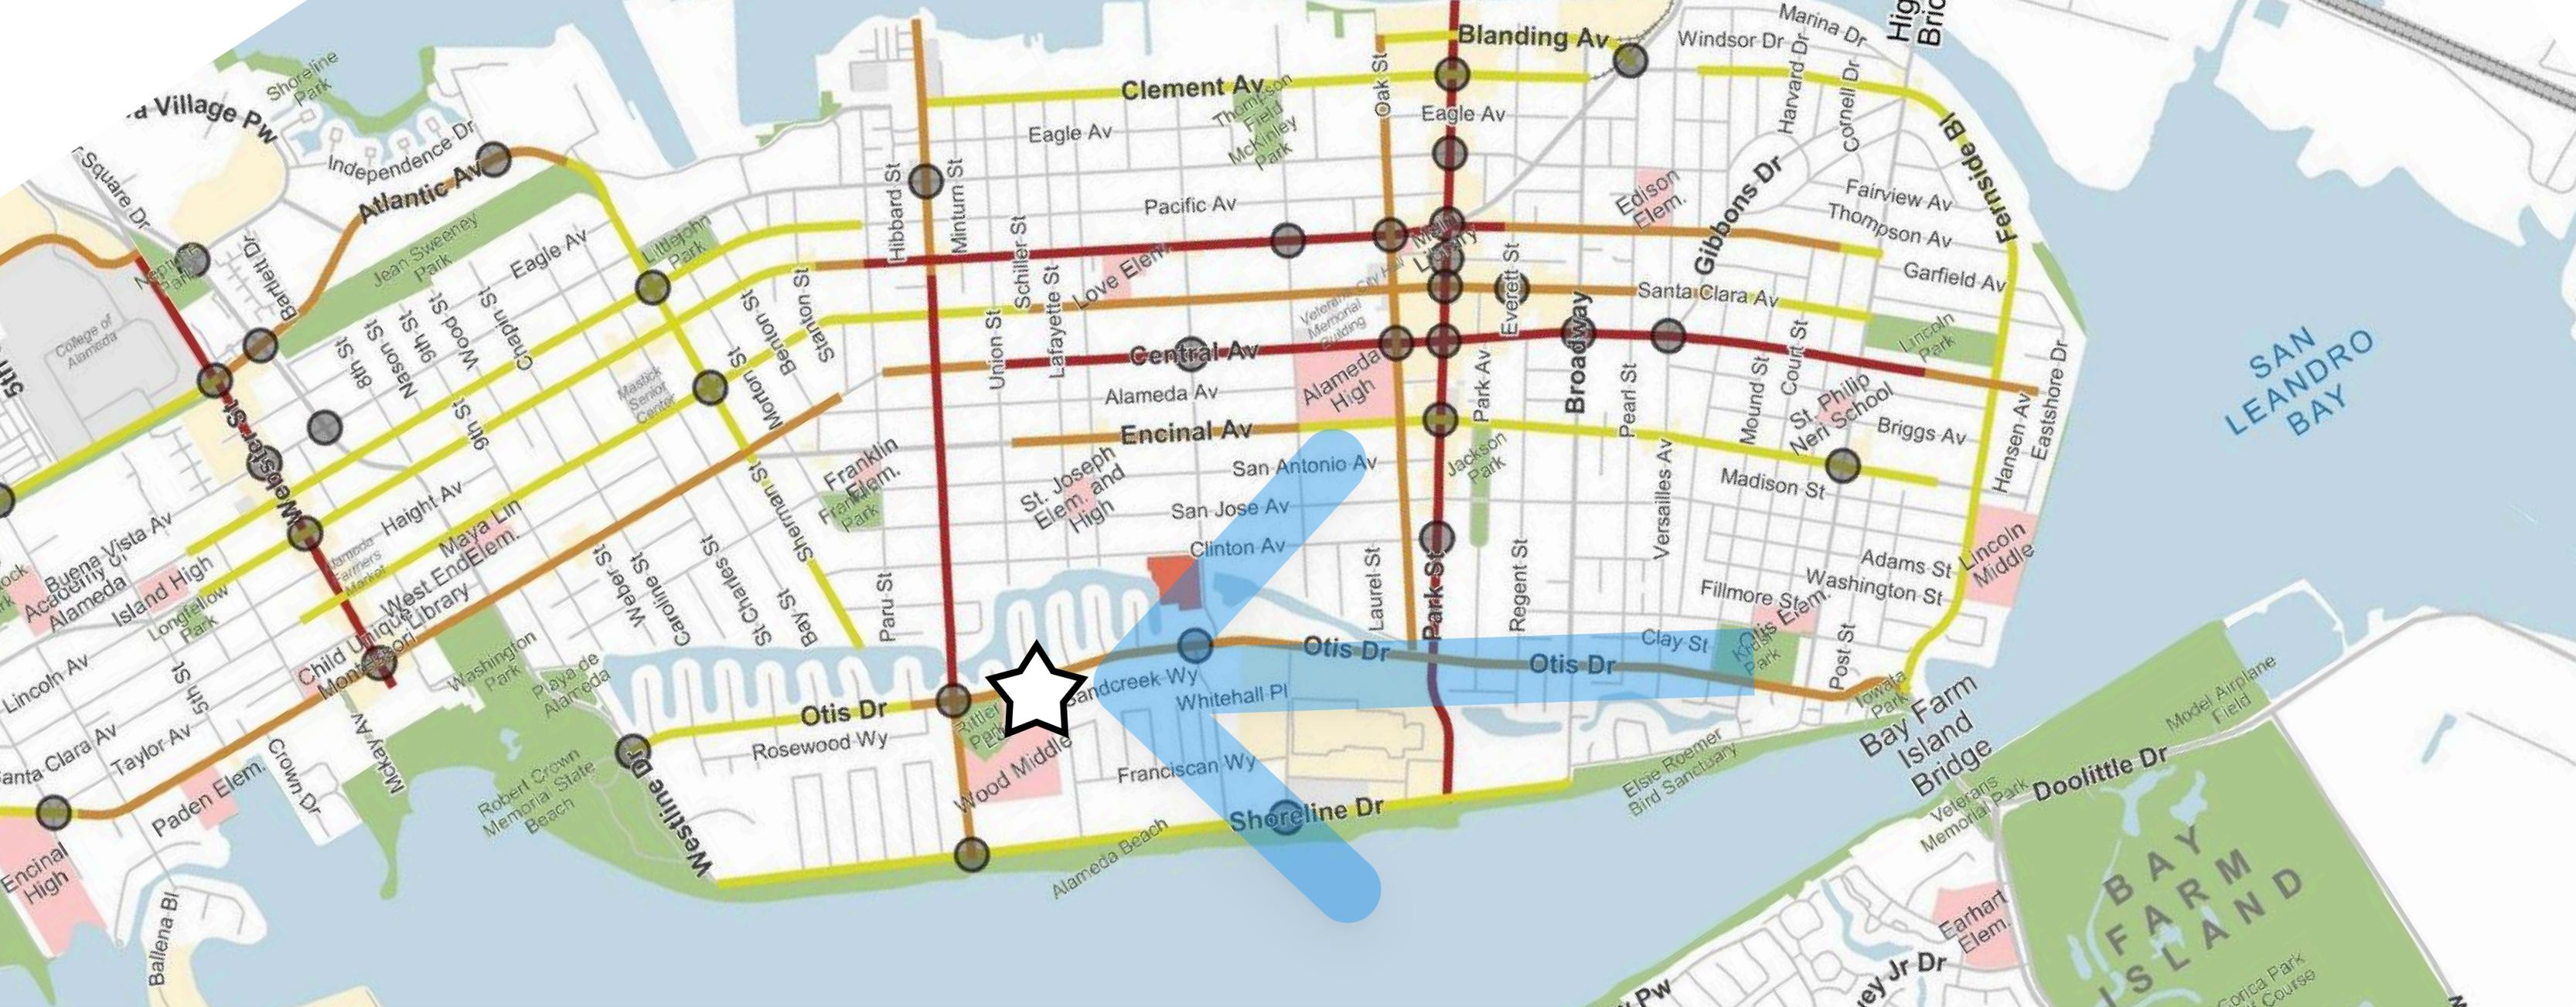

Note: No hand tally data was collected during the 2019-20 or 2020-21 school years due to the COVID-19 pandemic.

- Drive Alone** Students riding in cars only with those in their own household
- Shared Modes** Carpooling, taking the school bus, city bus, or BART
- Active Modes** Walking, biking, skateboarding, and other physically active modes

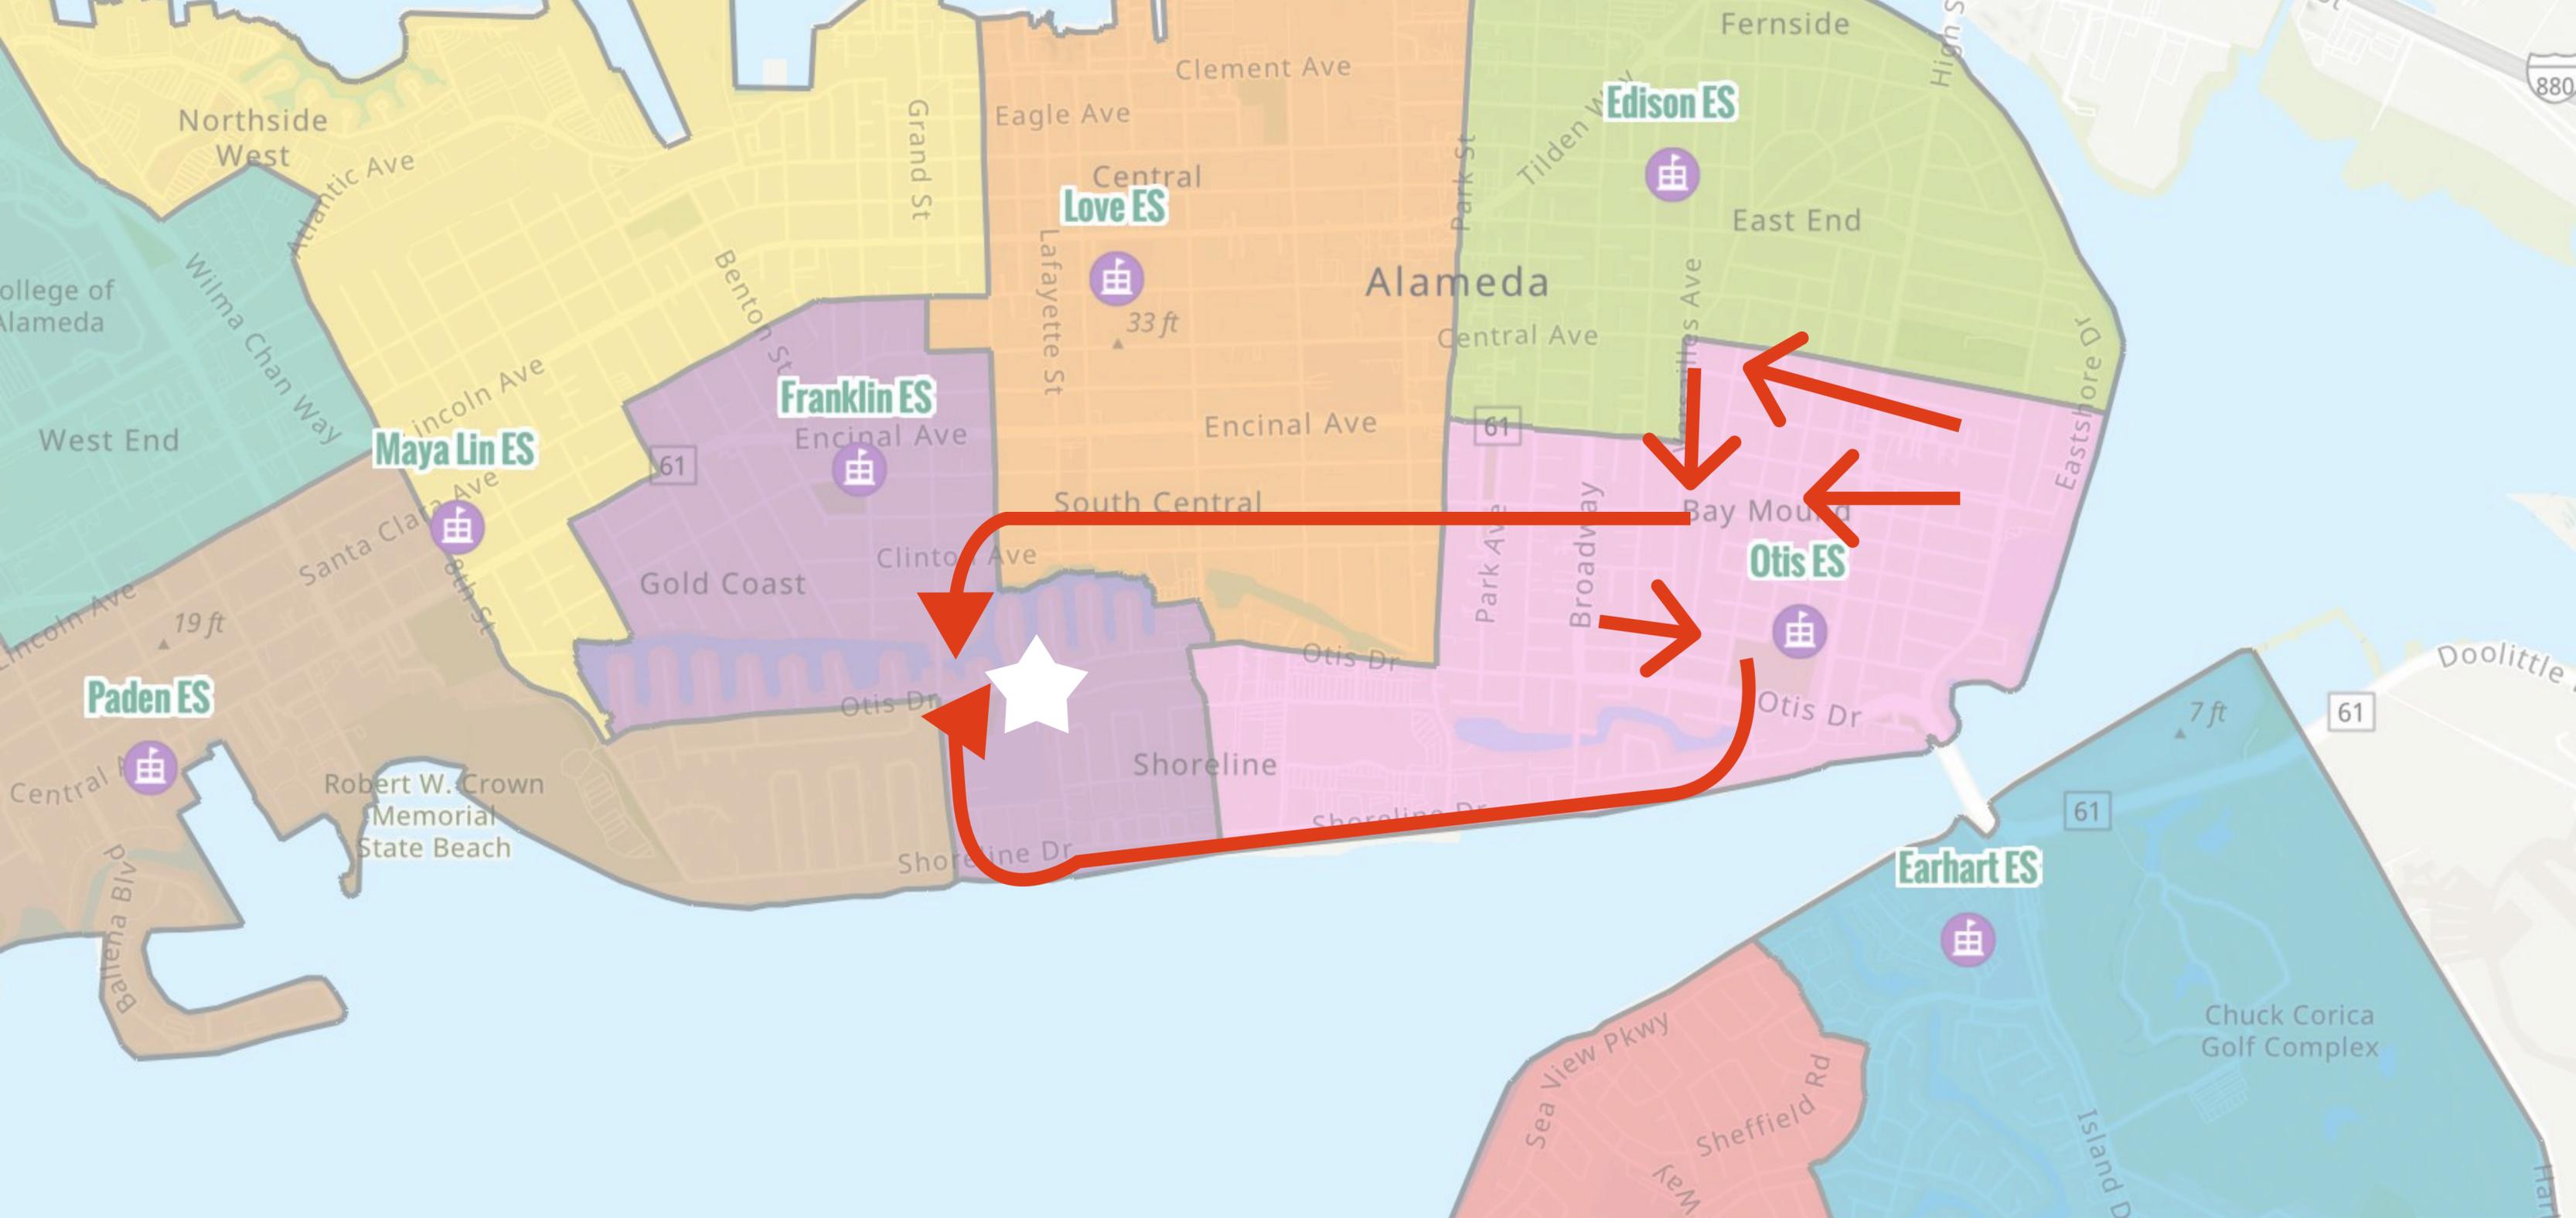

A challenge: For the next two school years, all Otis Elementary students will attend school at a temporary campus. The distance between the campuses is **just under 2 miles**.

The direct route between campuses, Otis Drive, is a **high injury corridor** (tier 2 across all modes; tier 1 for pedestrians)

For the portion owned by Caltrans, District 4 staff have pledged to deliver systematic safety improvements around the year 2032 — when all current Otis Elementary students will have graduated to middle or high school.

Students and parents who choose not to drive will use the city's **all ages and abilities network** to reach the temporary campus each day. This “low stress” network is **incomplete** — and is critical to the city having a **resilient transportation network**.
