

SERVICE PROVIDER AGREEMENT

This SERVICE PROVIDER AGREEMENT (“**Agreement**”) is entered into this ____ day of _____, 2023 (the “**Effective Date**”), by and between the CITY OF ALAMEDA, a municipal corporation (the “**City**”) and PARAMETRIX, INC., a Washington corporation, whose address is 1019 39th Avenue SE, Suite 100, Puyallup, Washington, 98374 (the “**Provider**”), with reference to the following facts and circumstances:

RECITALS

- A. The City is a municipal corporation duly organized and validly existing under the laws of the State of California with the power to carry on its business as it is now being conducted under the statutes of the State of California and the Charter of the City.
- B. The City is in need of the following services: Transportation engineering to improve the safety and operations of the Lincoln Avenue/Marshall Way/Pacific Avenue (Lincoln/Marshall/Pacific) corridor. On December 19, 2019, City staff issued a Request for Qualifications (RFQ) for on-call transportation services, and after a submittal period of 42 days received 19 responses. Staff reviewed the qualifications, created a list of 13 consultants, and selected the service provider that best meets the City’s needs from the list. Parisi Transportation Consulting, Inc. was one of the selected firms, and also was selected to develop the design concept for the Lincoln/Marshall/Pacific corridor. As of March 1, 2023, Parisi Transportation Consulting, Inc. joined Parametrix, Inc. This next design phase of the Lincoln/Marshall/Pacific corridor exceeds the cap on the amount for the on-call transportation consulting services. This Agreement allows for the design work on the Lincoln/Marshall/Pacific project to be separate and exceed the cap limit of the on-call transportation services, and is with the new company as the Provider.
- C. Provider is specially trained, experienced and competent to perform the special transportation engineering services, which will be required by this Agreement.
- D. The City and Provider desire to enter into an agreement for transportation engineering services for the Lincoln/Marshall/Pacific corridor, upon the terms and conditions herein.

8. NON-DISCRIMINATION:

Consistent with the City's policy and state and federal law that harassment and discrimination are unacceptable conduct, Provider and its employees, contractors, and agents shall

If the Claims filed against Indemnitees allege negligence, recklessness or willful misconduct on the part of Provider, Provider shall have no right of reimbursement against Indemnitees for the costs of defense even if negligence, recklessness or willful misconduct is not found on the part of Provider. Provider shall not have any obligations to indemnify Indemnitees if the loss or damage is found to have resulted solely from the negligence or the willful misconduct of the City. The defense and indemnification obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

b. As to Claims for professional liability only, Provider’s obligation to defend Indemnitees (as set forth above) is limited as provided in California Civil Code Section 2782.8.

c. Provider’s obligation to indemnify, defend and hold harmless Indemnities shall expressly survive the expiration or early termination of this Agreement.

On or before the commencement of the terms of this Agreement, Provider shall furnish the City’s Risk Manager with certificates showing the type, amount, class of operations covered, effective dates and dates of expiration of insurance coverage in compliance with Sections 10.b. Provider shall include the following language in their agreement with any sub-provider: "Sub-providers hired by Provider agree to be bound to Provider and the City in the same manner and to the same extent as Provider is bound to the City."

d. The requirements in this Section 13 shall not apply to persons who are merely providing materials, supplies, data or information that Provider then analyzes and incorporates into its work product.

kept separate from other documents and records and shall be maintained by Provider for a period of three (3) years after receipt of final payment.

c. If supplemental examination or audit of the Records is necessary due to concerns raised by the City's preliminary examination or audit of records, and the City's supplemental examination or audit of the records discloses a failure to adhere to appropriate internal financial controls, or other breach of this Agreement or failure to act in good faith, then Provider shall reimburse the City for all reasonable costs and expenses associated with the supplemental examination or audit.

Any suits brought pursuant to this Agreement shall be filed with the courts of the County of Alameda, State of California.

24. WAIVER:

A waiver by the City of any breach of any term, covenant, or condition contained herein shall not be deemed to be a waiver of any subsequent breach of the same or any other term, covenant, or condition contained herein, whether of the same or a different character.

Section 60-741, et seq.), in accordance with requirement of state or federal law. Provider shall take affirmative action to ensure that qualified applicants are employed and that employees are treated during employment without regard to race, color, religion, national origin, ancestry, sex, age, or condition of physical or mental handicap in accordance with requirements of state and federal law. The City reserves the right to determine independently that the anti-discrimination provisions of this Agreement have been violated. In addition, a determination by the California Fair Employment Practices Commission or the Federal Equal Employment Opportunity Commission that Provider has violated state and federal anti-discrimination laws shall constitute a finding by the City that Provider has violated the anti-discrimination provisions of Agreement.

c. The parties agree that in the event Provider violates any of the anti-discrimination provisions of this paragraph, the City shall be entitled, at its option, to the sum of \$500.00 pursuant to California Civil Code Section 1671 as liquidated damages in lieu of canceling, terminating, or suspending this Agreement.

**LINCOLN AVENUE/MARSHALL WAY/PACIFIC AVENUE
SAFETY IMPROVEMENT PROJECT, 65% CONSTRUCTION DOCUMENTS
SCOPE OF WORK**

The Lincoln Avenue corridor in the City of Alameda, California, measures a total of 3.1 miles and includes, from west to east, Pacific Avenue from Main Street/Central Avenue to Marshall Way; Marshall Way from Pacific Avenue to Fifth Street/Lincoln Avenue, and Lincoln Avenue from Fifth Street and Broadway. The Lincoln Avenue corridor project currently has a conceptual plan drawing for the full project extents developed by Parisi Transportation Consulting, a division of Parametrix. The conceptual plan includes the following elements and is provided as Appendix A:

- A modified cross-section to provide a “road diet” by reducing the number of through lanes from four to two, adding a center two-way left-turn lane, and including bikeway facilities as either buffered bike lanes (Class II bikeways) or separated bikeways (Class IV bikeways) with new roadway striping, pavement markings, and traffic control signs.
- One single lane roundabout and one neighborhood traffic circle. A third modern roundabout on the west project limit at Central Avenue will be developed as part of another project.
- Major intersection reconfigurations at up to 2 locations, Wilma Chan Way / Eighth Street and Pacific Avenue / Marshall Way.
- Minor intersection reconfigurations to add new marked crosswalks and corner curb reductions at approximately 21 intersections.
- New curb ramps or bulb-outs at up to 10 intersections totaling to approximately 40 civil features.
- Stormwater catchment features and/or landscaped areas at up to 12 intersections and planted medians for up to 18 trees.
- Traffic signal modifications at up to 9 locations, Pedestrian Hybrid Beacon crossings at up to 3 locations, and Rectangular Rapid Flash Beacon crossings at up to 4 locations,

The following scope of work to be performed by Parametrix summarizes tasks to develop 65 percent construction documents for the Lincoln Avenue corridor. All work products will conform to the latest standards contained in the CA MUTCD, Caltrans Standard Plans, Caltrans Design Information Bulletins, City standards plans, and other applicable standards. Environmental clearance for the project is assumed as the City of Alameda's responsibility.

TASK 1: PROJECT MANAGEMENT, SITE VISIT AND MEETINGS

Parametrix will attend a kick-off meeting and a site visit with City staff to review the project objectives, opportunities and constraints, schedule and deliverables. The proposed budget includes attendance and participation at up to 12 monthly coordination meetings. Parametrix will track project progress, decisions, and next steps using an online project summary that will be shared with City staff; the online project summary will also be used as regular meeting agendas. Parametrix will provide project updates as monthly progress reports and invoices.

Task 1 Deliverables:

- One online project kick-off meeting
- Online monthly project coordination meetings
- Monthly progress reports and invoices

TASK 2: PRELIMINARY (35%) DESIGN

Parametrix will lay out the entire Lincoln Avenue corridor at 1" = 20' scale on 22" x 34" plan sheets, equivalent to a 1" = 40' scale layout on 11" x 17" plan sheets. Each sheet will provide one panel to leave room for project notes and details. The 3.1-mile corridor equates to 28 layout sheets. Parametrix will use the conceptual plan's aerial photo base for this phase of the project. Right of way will be assumed as the back of existing sidewalk.

2.1 Civil layout plans. The civil layout plans will present the full study corridor and add civil construction notes and horizontal dimensions. The plans will identify areas with proposed excavation, grading, and/or stormwater drainage modifications; these areas will be included in the next design phase (90%) for utility marking, topographic survey, and detailed civil design. The plans will identify areas showing need for pavement repair as identified by the City. Construction notes will cite City or State standard details where applicable. Construction details will be provided in subsequent design submittals.

2.2 Striping and signage plans. The 28-sheet striping and signage plans will present the full study corridor and add striping construction notes and horizontal dimensions. The layout sheets will include existing traffic control signs, above ground traffic signal equipment; proposed vehicle and bicycle travel lanes; parking areas; bus stops; crosswalks; hybrid and flashing beacons; and other proposed traffic control and traffic calming features.

Sheets will include typical cross-sections with lane and parking dimensions where applicable. Construction notes will cite City or State standard details where applicable. Construction details will be provided in subsequent design submittals.

2.3 Turning path model. Parametrix will test all corners where there are proposed corner modifications. The City will identify the appropriate Design Vehicle (frequently present) and Control Vehicle (occasionally present) for typical intersection typologies, i.e., at local, collector and arterial streets. Vehicle turn paths will be modeled using AutoCAD Vehicle Tracking software to identify the necessary corner radii and allowable space to install intersection features. The

model results will be incorporated into the 35% preliminary design and the model outputs will be submitted as an appendix to the 35% plan set.

2.4 Preliminary Engineering Cost Estimate.

The 35% preliminary design level cost estimate will be based on approximate quantities for paving, striping, signage, and landscaping. Costs for civil features like curb ramps, bulb-outs, median islands, driveways, stormwater drainage, and utility relocations will be estimated on a “per each” basis. Traffic control features (e.g., signals, hybrid beacons, will be estimated on a “per intersection” basis.

Task 2 Deliverables:

- Preliminary (35%) design plan set with:
- Cover sheet, index of sheets, and draft general notes, 3 sheets
- Civil layout, 28 sheets
- Pavement delineation and signage, 28 sheets
- Vehicle turning path model exhibits for up to 25 intersections
- Preliminary engineering cost estimate

TASK 3: TECHNICAL STUDIES

Parametrix will prepare technical studies related to travel demand, intersection operations, and street lighting for the project study corridor.

3.1 Lighting models. Parametrix will research the existing luminaire placement, height, and rated brightness through as-built records provided by the City. A site walk with City staff will be performed to confirm the existing street lighting poles, luminaires, and service connection details for each light. With the City’s assistance, an assessment will be made of the potential for upgrading existing luminaires to brighter LED luminaires, if needed, and the potential for alternative technologies to provide supplemental lighting, e.g., solar LED lights.

Based on the findings of the site walk, Parametrix will develop a lighting model using Visual Lighting 2020 software to estimate existing lighting levels at intersections with existing traffic signals, at uncontrolled intersections with existing or proposed marked crosswalks, and at midblock locations. The modeled lighting levels will be verified against Caltrans standards for local intersections and roadways based on the average lighting (E_{avg}) and maximum lighting ratio (E_{avg}/E_{min}) standards.

Parametrix will confirm the model calibration with one nighttime lighting level sample at up to four intersections and six midblock locations. The lighting level model outputs will be provided as a summary table and heat map overlaid on the corridor layout plan. Roadway segments and intersections not meeting the Caltrans standard will be identified for further lighting improvements, initially as luminaire upgrades to brighter equipment and with new supplemental lights as needed. The findings of the lighting study will be incorporated into the detailed design phase.

3.2 Intersection operations models. Parametrix will compile recent multimodal peak hour traffic counts collected by the City and traffic signal timing cards for existing signalized intersections on

the Lincoln Avenue corridor. An existing conditions intersection model in Synchro 11 software (Cubic/Trafficware) will be prepared to estimate multimodal delay under existing conditions and with proposed lane, signal phasing, and signal timing changes. Intersections with high forecasted peak hour delay will be identified for further observation or adjustments.

New peak hour multimodal traffic counts collected by Parametrix will be subject to additional cost.

3.3 Travel demand model results summary. Parametrix will prepare a technical memorandum summarizing the methodologies used and the results of the City's travel demand modeling, with a focus on the Lincoln Avenue/Marshall Way/Pacific Avenue corridor. Parametrix will consult with Kittelson Associates, developer of the model, to review model inputs and outputs, and weekday peak hour traffic projections. The memorandum will also review citywide trends based on model assumptions and results.

3.4 Roundabout peer review. Parametrix will provide preliminary design details for the Lincoln Avenue/Fifth Street intersection roundabout to Kittelson Associates. Kittelson will offer a peer review of the intersection design, the results of which will be incorporated into the 65% design plans.

Task 3 Deliverables:

- Technical memo summarizing existing intersection and roadway lighting.
- Intersection models in Synchro 11 software.
- Technical memo summarizing travel demand model results
- Roundabout design peer review

TASK 4: PUBLIC MEETINGS

Parametrix will support of City staff at the following public meetings.

4.1 Stakeholder meetings. Parametrix will prepare for and participate in up to four stakeholder group meetings to review and discuss potential design and operational parameters along specific roadway segments. Stakeholders may include, but not be limited to, The Academy of Alameda, Love Elementary School, business groups, Alameda Free Library, etc. Parametrix will prepare meeting materials and present at each meeting. The meeting venue, meeting logistics, prints, translation services, and other supplemental meeting services shall be coordinated and provided by the City.

4.2 Transportation Commission meeting. Parametrix will prepare for and participate in a briefing to the Transportation Commission. The briefing will include an update on the project development, including the 35% plans, as well as additional information including a review of the travel demand model results summary.

Task 4 Deliverables:

- Preparation and presentation at up to four stakeholder meetings
- Preparation and presentation to Transportation Commission

TASK 5: 65% PLANS, SPECIFICATIONS AND ESTIMATE

5.1 Topographic Survey. UNICO will perform detailed (non-aerial) topographic surveying and base mapping derived from the established horizontal and vertical control as part of a previous preliminary study of the corridor. The topographic survey will focus on twenty-three (23) separate locations along the corridor. The limits of survey (provided by Parametrix) will cover a box or strip along the roadway or intersections at each of the 23 sites. Within these limits, UNICO will locate curbs, gutters, lip of gutter, pavement grade breaks, striping, cross walks, pavement crown, and quarter crown along the project limits. UNICO will survey all visible above ground utilities within the limits such as vaults, valves, inlets, manholes, lids, sanitary sewer, gas, electric, telecommunication, and other visible utilities. All topography will be mapped into an AutoCAD base file to include planimetrics, contours, 3D surface and points files.

UNICO will set durable control points derived from the California State Plane Coordinate System NAD83 and NAVD88 datums, for utilization of surveys and construction control.

5.1 Civil design plans. The civil layout plans will be updated in the 65% submittal to reflect City comments received at prior project phases. The civil details will present the demolition extents, horizontal and vertical layout, flowline profiles, and storm drain connection details where needed, for up to 37 curb ramps, four bus islands or bus bulbs, green street treatments at 12 intersections, 11 raised medians, and seven sidewalk and/or driveway modifications. The civil details will cite applicable City and State standards where applicable and provide custom details where needed.

5.2 Striping and signage plans. The striping design will be updated in the 65% submittal to reflect City comments received at prior project phases. The plans will provide quick build corner bulb details that include with design for striping, color treatment, mountable curbs, and vertical posts. The plans will provide striping and marking details where not addressed by a City or State standard plan. Striping quantities will be indicated on each sheet as callouts and summarized in a striping schedule.

Traffic signage design will update existing traffic control signs where necessary to reflect the new roadway design. The signage design will include four wireless solar rectangular rapid flash systems. The plans will provide custom sign mockups when not covered by a CA MUTCD standard sign. Sign and pole quantities will be summarized in a signage schedule.

5.3 Landscaping plans. The landscaping plans will provide 18 enlarged planting layout sheets at 1" = 8' scale for areas identified for green street or stormwater capture features and two sheets with planting and soil preparation details. The plans will present the approximate footprint of each plant to ensure adequate coverage and to allow accurate quantity takeoffs. This work scope assumes no irrigation design; this work may be added as an optional task.

5.4 Electrical (traffic signal and pedestrian hybrid beacon) plans. Parametrix will develop electrical plans for nine existing traffic signals and two new pedestrian hybrid beacons, two sheets for each location totaling to 22 design sheets and two detail sheets. The first plan sheet will reflect elements of the existing traffic signal system to be maintained or upgraded or new equipment for the hybrid

beacons; these may include signal controller cabinets, service cabinets, signal mast arm poles, signal poles, lighting standards, updated video detection equipment, conduits, conductors, and service connections. The design will take care to avoid conflicts with the existing overhead utility lines present along the study corridor. The second sheet will provide the conductor schedule, equipment schedule, construction notes, and construction details. This work scope assumes no signal interconnection work, this work may be provided as an optional task.

5.5 Roadway lighting plans. Parametrix will develop street lighting plans at 1" = 20' scale on a 22" x 34" plan sheet with 2 panels per sheet (14 layout sheets) and two detail sheets (16 total sheets). The street lighting plans will indicate the location of existing and proposed streetlights, locations with new or modified luminaire heads, and construction details for new equipment. New service connections, if needed, will be assumed as above-ground connections to match existing conditions. Utility undergrounding is not within this proposed scope of work.

5.6 Technical specifications. Parametrix will develop preliminary technical specifications for all bid items identified in the design plan. The specifications will follow City and State standard specifications for materials, execution, and payment quantities. Project special provisions are assumed to be the responsibility of the City.

5.7 Draft cost estimate. The draft cost estimates will be based on quantity takeoffs for the bid items identified in the 65% plans. Costs for civil features like curb ramps, bulb-outs, median islands, driveways, stormwater drainage, and utility relocations will be estimated for standard units as dictated by City or State standards. Signals and hybrid beacon systems will be estimated on a "per intersection" basis but will include detailed quantity takeoffs for the signal components.

Stormwater pollution prevention plans (SWPPP), temporary traffic control plans (TCPs), and encroachment permits are assumed as contractor responsibility. Utility relocation and/or service connection requests to utility companies are assumed as City responsibility.
