

August 4, 2025

Dear Captain Andrews,

This is to confirm that Puck LLC of Manning, Iowa is the sole source supplier for Puck Fire products in the State of California.

Thank you for your interest in our products, listed below are the parts and quantities for the Puck Fire TTR-15P.

Quantity of 2 61-00213-11 TTR-15P Hose Cart

- ~TTR-15 MKIV Chassis & Reel Top
- ~38hp EFI Gasoline powered Hydraulic Power Unit
- ~Manual Hydraulic Controls
- ~LED Hazard/Caution Lighting
- ~LED Work Lighting
- ~Two Single Speed Hydraulic Motors
- ~Electric Brakes
- ~DOT Road Compliant
- ~Puck Fire Red/Black Color Scheme

Justification for Sole Source Procurement: This procurement qualifies as a sole source based on the following criteria:

- **Exclusive Manufacturer Capabilities:** Puck LLC is the **sole manufacturer and distributor** of the TTR-15P Hose Reel Turntable Trailer. No other known vendor produces equipment with comparable design features, operational specifications, or compatibility with AFD's existing hose systems.

- **Specialized Functionality:** The TTR-15P is uniquely engineered for rapid deployment and retrieval of large-diameter fire hose, allowing precise hose management over extended distances. Its reel turntable configuration, modular design, and towing compatibility are not replicated by other commercially available alternatives.
- **Operational Continuity & Compatibility:** AFD's existing emergency hose infrastructure is configured to integrate with the specifications provided by Puck LLC. Procuring from a different vendor would compromise interoperability and introduce delays in critical emergency response operations.
- **Lead Time and Readiness Requirements:** Given the urgent timeline associated with Phase 1 of the Emergency Response Water Supply System, sourcing from Puck LLC ensures timely delivery and eliminates risks related to customization or retrofitting with alternative equipment.
- **Training and Support:** Puck LLC offers exclusive user training and technical support services for the TTR-15P system. These are proprietary to their equipment and essential for safe and effective operation by AFD personnel.
