The Police Department has been researching ways to meet City Council direction for Body-Worn Camera (BWC) review. Truleo can analyze BWC audio and prepares comprehensive reports in a fraction of the time it would take a person. Truleo technology does not keep camera metadata or video imagery. The software breaks down the data into two categories; potentially positive interactions and potentially negative interactions. This data will allow Police Department and City personnel to identify employees who may benefit from additional training, employees who may need wellness services, and recognize employees who demonstrate and provide the level of professional service we expect.

TRULEO

WHAT IS TRULEO

꙳꙳꙳꙳

TRULEO IS A BODY CAMERA AUDIO ANALYTICS PLATFORM THAT CONVERTS DATA INTO ACTIONABLE INSIGHTS.

WHY TRULEO

Police across the U.S. wear body cameras every day, but only 0.01% of the footage is reviewed - usually when there is an instance of potential misconduct. There is simply too much data for agencies to review by hand.

Truleo provides agencies with an audio analysis tool that cuts the review time, department budgets and provides important insights to improve policing.

⚑ EVENT CLASSIFICATION

Automatically classify events and identify videos for further review or as eligible for deletion

ⓘ RISK MANAGEMENT

Review the most volatile events of the day and address potential issues early and often

HUMAN-LEVEL ACCURACY

Our accurate & efficient audio analysis reduces legal costs & human hours; resulting in a substantial savings for police departments.

50%	90%	50%	80%
REDUCTION IN LITIGATION TIME	REDUCTION IN VIDEO REVIEW TIME	REDUCTION IN LEGAL FEES	REDUCTION IN STORAGE FEES

SECURITY & COMPLIANCE

Our technology only analyzes body camera audio. Camera metadata & video imagery discarded, creating a private, secure way to improve policing practices.
