Mayor and Councilmembers:

I had a Councilmember request the ages of the people who were administered Narcan per the data reported in the CARE Report being presented on 2/21. Per this request, please find attached a report that provides minimum age, maximum age, and the median age for Alameda Fire Department (AFD) 2022 Narcan administration. As you can see from this data there were no youth under 18 that were administered Narcan by AFD. We would need a week lead time to request any raw age data from our contractor, if desired. Also, per Alameda Unified School District there have been no overdose cases in Alameda schools or with Alameda students to date.

Thanks,
Jennifer
