Project Plan Introduction

The implementation of the proposed water infrastructure within the Reuse Areas of Alameda Point must follow a careful plan to adhere to the Water Infrastructure Agreement executed between the City of Alameda and EBMUD. The Agreement outlines the milestones required and related timelines in order address both the City's and EBMUD's processes and regulations. CBG was directly involved in the planning of these milestones and development of the proposed water infrastructure phased projects. Accordingly, CBG keenly understands the requirements of the Agreement. The project plan and scope of services that CBG has outlined in this proposal is focused and tailored to achieve these milestones.

A critical component that CBG's Design Team will maintain as a focus is assisting the City with assembling the required EBMUD Water Service Applications for each tenant and user affected by each phase of the water infrastructure project. This will require working closely with the City, the City's property managers and the tenants to ensure each water connection is correctly characterized and planned prior to EBMUD's review and processing. Similarly, CBG will work with the Alameda Fire Department to document the required fire protection measures for the historical buildings within the Reuse Areas that are served by the proposed water infrastructure. The design criteria established through these focused efforts are of critical importance for both the City and EBMUD to understand the water delivery requirements within each phase and to each user. CBG understands that the project construction costs and related fees are greatly affected by this design criteria. CBG will maintain the appropriate oversight to manage expectations and efficiently manage the project criteria to control unnecessary cost overruns.

In addition to the water infrastructure, CBG understands that the other future backbone infrastructure within the areas of the water infrastructure need to be planned appropriately. We have assembled a multi-discipline Design Team to ensure all of the appropriate expertise are represented in this infrastructure planning. This is an important component of this design process, ensuring the City's ability to feasibly implement the full replacement of backbone infrastructure within the Reuse Areas. This same Design Team has the experience and capability to take forward a full design and preparation of construction documents for the entire backbone infrastructure systems, should the City determine that is desired.

The project plan and CBG's approach is to include a number of design coordination and tenant outreach meetings as there are a number of affected parties that need to be engaged as part of this project. CBG's approach to consistently engage and address concerns of the various utility agencies and tenants will be imperative to professionally represent the City in this endeavor to provide its community sustainable water infrastructure.

Lastly, CBG and its Design Team is actively working on a number of complex mixed-use redevelopment projects in the Bay Area, including other military base reuse projects and other projects that require the installation of EBMUD water infrastructure. CBG understands the process of designing infrastructure in these conditions and has incorporated this understanding to the following project plan and scope of services. The following scope of services applies to all three phases planned for the water infrastructure. The associated fee estimate has been provided in phases so that the City can evaluate and proceed with some or all of these phases.

Project Plan

Scope of Services

TASK 1 – PRELIMINARY DESIGN

Task 1.1 Agency Kickoff Meetings – CBG will meet with City staff to review the project scope and schedule, existing base map material provided by the City, design assumptions, and other design issues. A field walk of the project area will be conducted with City Staff. Following the meeting with City Staff, CBG will meet with EBMUD, AMP and the Alameda Fire Dept. to review the details of the planned project and gather an understanding of each agencies requirements and sensitivities relative to this project.

Task 1.2 Utility Locating – Subtronics will use ground penetrating radar to identify the locations of existing underground utilities within the project areas.

Task 1.3 Project Design Criteria Documentation – CBG will review the schematic plans previously assembled for the water infrastructure relative to input received at the Agency kick-off meetings. CBG will also review the results of the City-commissioned existing water system mapping. CBG will update the Water System Schematic plans for Phases 1, 2 and 3 to reflect the input received, newer mapping, and utility locating. Also, CBG will prepare a project design criteria outline including the anticipated fire flow requirements, proposed fire hydrant locations, anticipated potable, fire and irrigation service locations for the City's, Alameda Fire Dept. and EBMUD's review.

Deliverables: Updated Water System Schematic and Design Criteria Outline.

Task 1.4 Geotechnical Report – ENGEO will explore and characterize the subsurface conditions of the project site based on their database of historic subsurface data and previous site characterizations. They will prepare a geotechnical investigation and provide recommendations for groundwater and geotechnical mitigations, trench sections, and pavement sections.

Deliverables: Geotechnical Report.

Task 1.5 Supplemental Field Survey – CBG will perform an additional field survey of the project area to supplement the existing aerial topography provided by the City. The field survey will include locating physical improvements and facilities that may impact the project design.

Task 1.6 Right of Way Mapping – CBG will calculate the existing and proposed street right-of-ways based on existing records and the MIP. Through our past surveying efforts on behalf of the City at Alameda Point, CBG has already performed a field boundary survey and verified existing property corners and monuments. CBG will assemble a Right of Way Exhibit which will show existing right of ways, property lines and proposed right-of-ways to be established within the project boundaries. CBG will review the proposed right of ways and associated street sections with City Staff to confirm they are acceptable or adjust as needed.

Deliverables: Boundary Survey Exhibit.

Task 1.7 Backbone Infrastructure Layout – CBG, Schaaf & Wheeler, and Balance Hydrologics will utilize the MIP and all other available information regarding the existing utility systems to prepare a layout of the proposed backbone infrastructure systems within the areas of the proposed water infrastructure. This layout will be preliminary and demonstrate the feasibility of the future installation of the other backbone infrastructure systems.

Project Plan

Task 1.8 Draft Water Service Application Coordination – CBG will work with City Staff and property managers to assemble the required information for each potable and fire service required to be reconnected for each phase of water infrastructure. This will include a summary of water fixtures, estimated daily water usage and required fire flow for each tenant space or unoccupied building. CBG will incorporate this information into drafts of the EBMUD Water Service Application for the City, Alameda Fire Dept. and EBMUD review.

Deliverables: Draft Water Service Applications

Task 1.9 Preliminary Design Exhibits – CBG will prepare Preliminary Design Exhibits for Phases 1, 2 and 3 that will include all of the information assembled through the tasks described above. This preliminary plan will depict the proposed potable and fire water services to each building, the proposed fire hydrant and irrigation services, as well as the existing water facilities that will be removed or abandoned with this project. Any potential points of conflict and associated solutions will be presented in the Preliminary Design Plan. This preliminary design plan will be the basis for EBMUD's Mainline Extension Application.

Deliverables: Preliminary Design Exhibits

Task 1.10 Preliminary Design Review Meetings – CBG will meet with City staff and EBMUD to review comments and suggestions on the Preliminary Design Plan and draft Water Service Applications. These will be incorporated as appropriate.

Task 1.11 Tenant Outreach Meetings – CBG will meet with City staff and tenants to present the water infrastructure improvements, potential impacts to the tenants and review of the water service applications for each tenant.

Task 1.12 EBMUD Mainline Extension Application – CBG will assemble and submit the required materials for the EBMUD Mainline Extension Application. This will include the following items:

- EBMUD Mainline Extension Application
- Preliminary Design Exhibits
- Boundary Survey Exhibits
- Soil Management Plan (Previously Prepared by Others)
- Draft Water Service Applications

Milestone #1 – Submittal of EBMUD Mainline Extension Application

Task 1.13 Preliminary EBMUD Design Review Meeting and Assistance – Once EBMUD completes their preliminary water system design and water service estimate, CBG will review and meet with EBMUD to discuss their materials. CBG will assist the City with evaluating the requirements of the EBMUD design and mainline extension agreements.

TASK 2 – MAINLINE EXTENSION CONSTRUCTION DOCUMENTS (75%, 95%, AND 100%)

Construction Plans, Specifications, and Cost Estimates will be provided for each plan review submittal. Plan Review Submittals will be done at the 75%, 95%, and 100% review levels. The following will be included with each design milestone:

- 75% Design and Preliminary Estimate
- 95% Design, Specifications, and Estimate
- 100% Final Plans, Specifications, and Detailed Estimate

Task 2.1 Improvement Plans – CBG will prepare a 1"=40' scale Improvement Plan in accordance with the City of Alameda and EBMUD requirements. The Improvement Plans will include plan and profile sheets for the water main installations, potable water, fire water, irrigation services, fire hydrant locations, and details.

Deliverables: Four (4) sets of constructions documents in hard copy format. Specifications and Estimates will be provided to the City in both hard copy and electronic format.

Task 2.2 Existing Utility Potholing – CBG will arrange for critical existing utility conflict locations within the project area to be potholed (assume 5 potholes per phase). A field survey will be conducted to identify the elevations of the existing utilities to ensure the design accuracy for critical vertical separation to the proposed water facilities. CBG will utilize the Underground Service Alert to locate all utilities within this area. Then the appropriate application for Right of Entry will be processed with City and Subtronics will expose the existing utilities.

Task 2.3 Erosion Control Plan / Storm Water Pollution Prevention Plan – CBG will prepare an Erosion Control Plan and Storm Water Pollution Prevention Plan (SWPPP) in accordance with the City of Alameda requirements. Plans will include water pollution control practices for erosion and sediment, construction activities, and post-construction storm water management.

Consultant Agreement for Civil Design Services

We have reviewed the City's Standard Consultant Agreement and the only requested change we are making is Section 10.A.(3) of the Agreement – CBG's automotive combined single limit is \$1,000,000.

Project Assumptions

1. The proposed water mains will not require any relocations of other existing utilities.
2. Engineer will prepare one set of construction documents for each phase.
3. The City will pay all agency application permit and EBMUD fees.
4. The project schedule is dependent on City and EBMUD review. The schedule will be adjusted to account for any extensions in review time.
5. City will provide the required information regarding environmental remediation of soils within the project limits as required by EBMUD.
6. City will provide fixture unit counts within each tenant space or unoccupied building.
7. EBMUD will prepare Water System Plans.

Project Exclusions

1. Any design beyond the scope of services including, but not limited to, structural design of thrust blocks and fire flow analysis.
2. Phasing Plans.
3. Landscape or irrigation plans.
4. Monumentation of unmarked property lines.
5. Construction staking and construction administration.
6. Cathodic protection system inspection and report.

- a. In the performance of your ongoing operations;
- b. In connection with premises owned by or rented to you; or
- c. In connection with "your work" and included within the "product-completed operations hazard".
