Clement Avenue Complete Street Concept Proposal

Public Works Department – May 2015

Why Clement Avenue?

Why Clement Avenue? (cont.)

- - Policy:

"Pursue opportunities to utilize the corridor of the former Alameda Belt Line railroad for transit, bicycle and pedestrian transportation."

- Street Classifications:
 - Truck Route
 - Transit Priority Street
 - Bicycle Priority Street

Why Clement Avenue? (cont.)

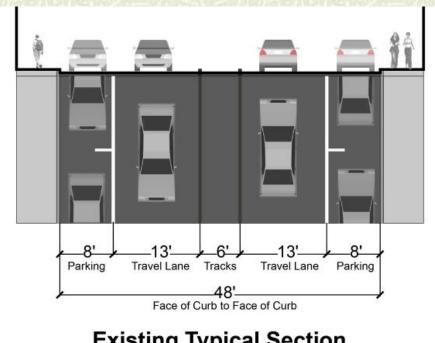

Cross Alameda Trail Study (2005)

Image Source: Bike Walk Alameda

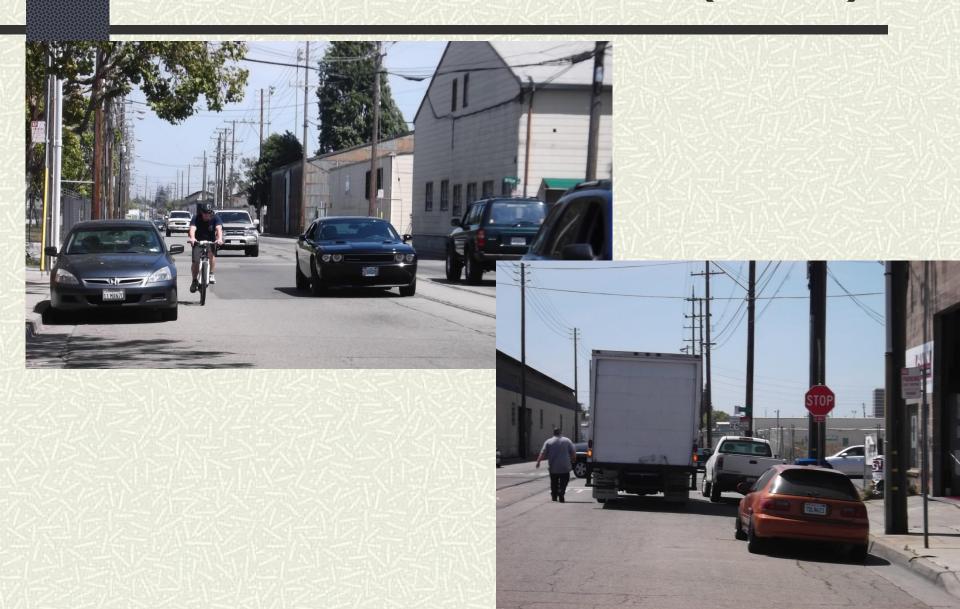

What's on the street?

- Railroad tracks
- **#** Utilities
- Vehicles/day: 8,300
- 35 mph typical speed
- # Truck route (11% = heavy)vehicles)
- No bikeway (PM peak hour = 35 bicyclists)

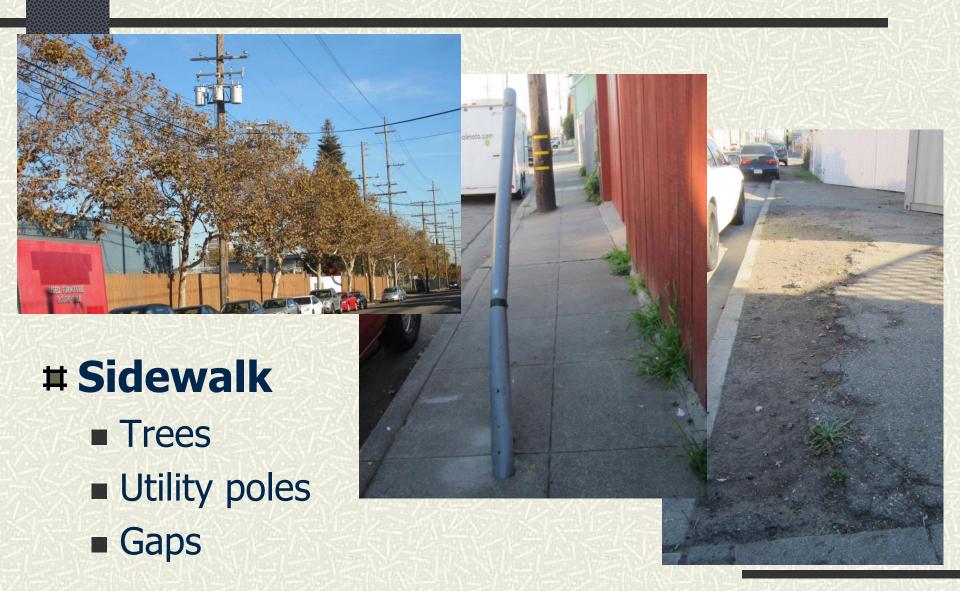

Existing Typical Section

What's on the street? (cont.)

What's on the street? (cont.)

Community Meetings

Goals

- 1) Remove the abandoned railroad tracks.
- 2) Encourage bicycling and walking.
- 3) Improve the streetscape.
- 4) Traffic calming.
- 5) Improve public access to the SF Bay.
- 6) Encourage transit use.
- 7) Revitalize Northern Waterfront area.
- 8) Improve truck access.

Transportation Commission (TC)

Concept Proposal Approved by TC

- SF Bay Trail preference
- Traditional bike lanes (New!)
- Railroad track removal

- Undergrounding utilities
- Sidewalk improvements
- Pavement resurfacing
- Intersection/driveway improvements
- Disabled parking spaces
- Truck access

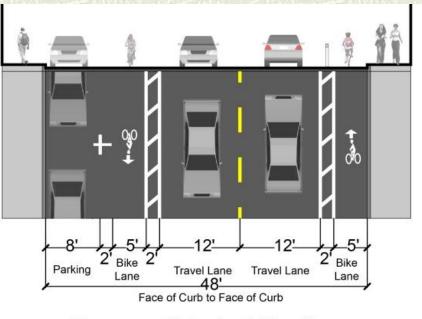

TC Approval (cont.)

Traditional or Conventional Bike Lanes

What do you think?

■ Oak to Grand: Buffered Bike Lanes

 No Parking on North/Estuary Side of Street

Proposed Typical Section

What do you think? (cont.)

■ Buffered Bike Lanes

- Benefits
 - Increases separation between cyclists from motorists
 - Encourages bicycling 8 to 80 years old!
- Cons
 - Removes parking

If we remove parking...

Chestnut S

- North Side of Street 10 a.m.
 - Total = 78 spaces
 - Counted = 50 vehicles on one weekday
 - Parking Occupancy = 64%
 - Two blocks at capacity: Grand to Union

- **■** South Side of Street 10 a.m.
 - Total = 118 spaces
 - Counted = 69 vehicles on one weekday
 - Parking Occupancy = 58%
 - Block at capacity: Lafayette to Chestnut

- **#** Parking Removal − North Side − 10 a.m.
 - Total = 118 spaces on south side
 - Projected occupancy on south side
 - NEW south side demand = 119 vehicles
 - NEW Parking Occupancy = **101%**
 - Blocks at capacity:
 - Grand Street to Schiller Street
 - Lafayette Street to Chestnut Street
 - Stanford Street to Willow Street
 - Elm Street to Oak Street
 - = Over 85% optimal parking utilization

- North Side of Street 3 p.m.
 - Total = 78 spaces
 - Counted = 44 vehicles on one weekday
 - Parking Occupancy = 56%
 - Blocks at capacity:
 - Grand Street to Minturn Street
 - Stanford Street to Walnut Street

- **■** South Side of Street 3 p.m.
 - Total = 118 spaces
 - Counted = 62 vehicles on one weekday
 - Parking Occupancy = 53%
 - Blocks at capacity:
 - Grand Street to Minturn Street

- Parking Removal North Side 3 p.m.
 - Total = 118 spaces on south side
 - Projected occupancy on south side
 - NEW south side demand = 106 vehicles
 - NEW Parking Occupancy = **90%**
 - Blocks at capacity:
 - Grand Street to Schiller Street
 - Lafayette Street to Chestnut Street
 - Stanford Street to Willow Street
 - = Over 85% optimal parking utilization
