

Summary of Cannabis License Types

License Type	State Authority	Description
Retail, including delivery	Bureau of Cannabis Control (Bureau)	Retail includes dispensaries that have walk up with or without delivery services and closed to the public delivery services.
Manufacturing	Department of Public Health	Manufacturing of cannabis includes volatile and non-volatile extractions, production of edibles, topicals, oils and other products. It also includes packaging and labelling.
Cultivation	Department of Food and Agriculture	Cultivation includes indoor and indoor mixed light (a combination of artificial and natural light) in areas from zero to 22,000 square feet. Outdoor only cultivation can be zero to one acres. Large indoor or mixed light cultivation over 22,000 square feet, or outdoor only cultivation over an acre is not available until 2023. Cultivation also includes nurseries (clones, immature plants, seeds & other agricultural products).
Distribution	Bureau	Distribution includes business to business movement of goods to stores and other businesses that sell to consumers. It also includes packaging or labelling.
Testing	Bureau	Test of cannabis or cannabis products. These test include checking for the levels of Tetrahydrocannabinol, Tetrahydrocannabinolic Acid, Cannabidiol, Cannabidiolic Acid and terpenes, Cannabigerol, Cannabinol and any other compounds or contaminants as required by the Bureau.
Microbusiness	Bureau	Microbusiness includes cultivation in less than 10,000 square feet, distribution, non-volatile manufacturing and retailing of cannabis. This is a vertically integrated business license.
