Hello:

Using information from the USGS map done in 2008 is a mistake. That information does not accurately reflect traffic conditions in Alameda today.

I try to avoid leaving the Island via the Tube between 7:30 to 8:30 everyday because it takes 20 minutes whereas other times it will take less than 5 minutes.

Unfortunately on Thursday the 18th at at 8:45 am, it was 30 minutes+ to go two miles because of a stalled vehicle. Stalled vehicles, floods, stoppages on the Oakland side, accidents, etc. are routine events and consistently back up traffic.

Returning to Alameda from 5-6 pm via the tube is excruciatingly slow and will take 20+ minutes every weekday.

Thank you in advance for your consideration.

Sincerely,
