# 1. ENGINEER'S LETTER

The City of Alameda (the "City") has engaged NBS to prepare and file an Engineer's Report. The purpose of the this Engineer's Report is to present the need for the increased assessments within the existing Island City Landscaping and Lighting District No. 84-2, Zone 4 (the "Zone"), for the Fiscal Year 2019/20 and all subsequent years.

This Engineer's Report presents the plans and specifications describing the improvements, services and activities, an estimate of the costs of the improvements, services and activities for the Zone for the 2019/20 Fiscal Year, a diagram showing the area and properties to be assessed, and an assessment of the estimated costs of the improvements, services and activities, assessing the net amount upon all assessable lots and/or parcels within the Zone in proportion to the special benefit received. If the levy of the proposed increase in assessments within the Zone is not approved by the property owners, the existing Zone assessments shall remain in place.

The following maximum allowable assessment is proposed to be authorized in order to pay the estimated costs of the improvements, services and activities to be paid by the assessable real property within the boundaries of the Zone in proportion to the special benefit received. The following table summarizes the assessment within the Zone:

Description	Zone 4 FY 2019/20 Estimated Maximum Budget <sup>(1)</sup>
District Maintenance <sup>(2)</sup>	\$50,000.00
Landscape Maintenance	11,530.00
Irrigation – Electric	1,500.00
Irrigation – Water	7,000.00
Seasonal Decoration Installations	8,480.00
Public Litter Can Management	2,450.00
Sidewalk Pressure Washing	40,000.00
Incidental/Misc. Expenses	1,748.00
<u>Capital Improvements</u>	
Landscape Capital Improvements <sup>(3)</sup>	15,640.00
Beautification/Districtwide Improvements <sup>(4)</sup>	20,529.00
Tree Trimming and Treatment <sup>(5)</sup>	2,590.00
Accounting, Engineering & Admin Costs	13,857.48
Reserve Fund Collection	8,766.22
<u>General Benefit Contribution</u>	<u>(5,557.79)</u>
<b>Estimated Costs and Expenses</b>	<b>\$178,532.91</b>
<b>Total Zone Special Benefit Points</b>	<b>1,820.66</b>
<b>2019/20 Maximum Allowable Assessment Per BP</b>	<b>\$98.06</b>

(1) Actual total amounts may vary slightly due to rounding and changes in total Benefit Points.

(2) Includes litter and debris clean up on sidewalks and graffiti removal.

(3) Maintenance will occur every five years (includes demolition, irrigation, and new plantings)

(4) Ongoing yearly costs to support various beautification improvements.

(5) Maintenance will occur every five years, annual treatment cost of \$4,930 included in landscape maintenance.

In making the assessments contained herein pursuant to Chapter 3 Article V of The City of Alameda Municipal Code (the “Alameda Municipal Code”), Article XIID, section 4 of the Constitution of the State of California (“Article XIID”) and the Proposition 218 Omnibus Implementation Act (“Proposition 218”) (California Government Code section 53750 *et seq.*), (the Alameda Municipal Code, Article XIID, and Proposition 218 are collectively referred to as the “Assessment Law”):

1. I identified all parcels which will have a special benefit conferred upon them from the improvements described in this Engineer’s Report (the “Specially Benefited Parcels”). For particulars as to the identification of said parcels, reference is made to the Assessment Diagram, a copy of which is included in this Engineer’s Report.
2. I have assessed the costs and expenses of the improvements upon the Specially Benefited Parcels. In making such assessment:
  - a. The proportionate special benefit derived by each Specially Benefited Parcel from the improvements was determined in relationship to the entirety of the maintenance costs of the improvements;
  - b. No assessment has been imposed on any Specially Benefited Parcel which exceeds the reasonable cost of the proportional special benefit conferred on such parcel from the improvements; and
  - c. Any general benefits from the improvements have been separated from the special benefits and only special benefits have been assessed.

I, the undersigned, respectfully submit the enclosed Engineer’s Report and, to the best of my knowledge, information and belief, the Engineer’s Report, Assessments, and the Assessment Diagram herein have been prepared and computed in accordance with the order of the City Council of the City of Alameda and the Assessment Law.

---

John G. Egan  
Assessment Engineer  
R.C.E. 14853

## 2. INTRODUCTION

---

### 2.1 Background

The Island City Landscaping and Lighting District No. 84-2 (the “District”) was formed in 1984 to finance the maintenance and servicing of various landscaping improvements located within the boundaries of the District. The District currently made up of six distinct benefit zones. The assessment rates within current Zone 4 (the “Zone”) of the District have not been increased since the implementation of Proposition 218 in 1997 and currently do not have sufficient revenue to keep up with the costs of the improvements.

### 2.2 Reason for Proposed Assessment

Approval of the proposed increase in assessments covered by this Engineer’s Report will generate the revenue necessary for the cleaning, safety, economic development, beautification, and management activities more fully described in Section 3.2. The Zone’s improvements, services and activities include all necessary services, operations and administration required to keep the Zone improvements and area in an operational and satisfactory condition as well as provide for the ongoing services and activities. The increase will also add an annual cost of living inflator beginning July 1, 2020. Currently, the Zone does not have an annual cost of living inflator included in the method of assessment. The establishment of an annual escalation clause for inflation is necessary in order to help ensure that the Zone can continue the level of maintenance and servicing of the improvements in future years as costs increase due to inflation or due to the increased cost of utilities beyond the City’s control.

### 2.3 Process for Proposed Assessment Increase

The City cannot increase assessments within the Zone without complying with the procedures specified in Article XIII D of the California Constitution and the Proposition 218 Omnibus Implementation Act (California Government Code Section 53750 et seq.). In November 1996, the voters in the State of California added Article XIII D to the California Constitution imposing, among other requirements, the necessity for the City to conduct an assessment ballot procedure to enable the owners of each property on which assessments are proposed to be enacted or increased, the opportunity to express their support for, or opposition to, the proposed assessment or increase in such assessment. The basic steps of the assessment ballot procedure are outlined below.

The City must prepare a Notice of Public Hearing (“Notice”), which describes, along with other mandated information, the reason for the proposed assessments or increase and provide a date, time and location of a public hearing to be held on the matter. The City must also prepare an assessment ballot, which clearly gives the property owner the ability to sign and mark their assessment ballot either in support of, or in opposition to, the proposed assessment or increase. The Notice and assessment ballot are mailed to each affected property owner within the Zone a minimum of 45 days prior to the public hearing date as shown in the Notice.

After the Notice and assessment ballot are mailed, property owners are given until the close of the public hearing, stated in the Notice, to return their signed and marked assessment ballot. During the public hearing, property owners are given the opportunity to address the City Council and ask questions or voice

their concerns. After the public hearing, the returned assessment ballots received prior to the close of the public hearing are tabulated and the results are announced by the City Council.

Article XIID provides that if, as a result of the assessment ballot proceeding, a majority protest is found to exist, the City Council shall not have the authority to enact or increase the assessments as proposed. A majority protest exists if the assessments represented by ballots submitted in opposition exceed those submitted in favor of the assessment. All returned ballots are tabulated and weighted according to the financial obligation of each particular parcel.

If there is no majority protest as described above, the City Council may approve the proposed increase in assessments for the Zone. If there is a majority protest, as described above, the City will continue to levy the existing Zone assessments.

### 3. PLANS AND SPECIFICATIONS

---

The Zone will provide for the ongoing cleaning, maintenance, safety, beautification, and management activities all located within the boundaries of the Zone.

#### 3.1 Description of the Boundaries

##### Zone 4 (Park Street)

Zone 4 of the Island City Landscaping and Lighting Maintenance District 84-02 is located in the City of Alameda in the area generally located along Park Street southwest of the City limits to the intersection at San Jose Avenue and includes whole or partial blocks immediately east and west of Park Street along Lincoln Avenue, Santa Clara Avenue, Central Avenue, Alameda Avenue, and Encinal Avenue. The specific areas included in the boundaries are:

- Park Street from Blanding Ave to San Jose Avenue
- Blanding Avenue from Oak Street to Park Street (North side only)
- Lincoln Avenue from Oak Street to Everett Street
- Webb Avenue from Park Street to Everett Street
- Santa Clara Avenue from Oak Street to Broadway
- Central Avenue from Oak Street to Broadway
- Alameda Avenue from Oak Street to Park Street
- Encinal Avenue from Oak Street to Park Avenue
- Park Avenue from Santa Clara Avenue to Central Avenue
- Everett Street from Santa Clara Avenue to Central Avenue

#### 3.2 Description of the Improvements and Services

The improvements provided within the Zone include, but are not limited to, the operating, maintaining, and servicing of all public landscaping improvements, consisting of trees, medians, refuse containers, sidewalks, plant materials, pathways, irrigation systems, lighting systems, and associated appurtenant facilities. Services include, but are not limited to, personnel, materials, contracting services, electrical energy, water required for all necessary maintenance, replacement, repair and administration, required to keep the above mentioned improvements in a healthy, vigorous and satisfactory condition.

The Maintenance and Cleaning Program includes regular sidewalk sweeping, alley cleaning, refuse removal, regularly scheduled steam cleanings, pressure washing, graffiti removal, tree pruning and watering, tree well weeding with crushed granite replenishment, as well as other related activities.

A team of maintenance workers will carry out the following tasks:

### 3.2.1 CLEANING AND MAINTENANCE

Services will be provided seven days a week, Monday through Sunday with the following frequencies:

#### DAILY:

- Removal of litter and trash from sidewalks and street furniture including recycling and disposal at proper facilities.
- Proper maintenance of public litter cans to include: tops and sides, space between litter can and internal liner, and any materials that may surround a litter can.
- Monitor public litter cans and remove excess waste from litter cans to prevent overflowing. Monitor waste hauler to ensure high level of service.
- Sidewalk sweeping with sweeping machine.
- Removal of graffiti from public property. Reporting of graffiti to private property owners.
- Removal of illegal signage.
- Removal and return of shopping carts.
- Monitor maintenance of landscaping and report any problems to the City.
- Remove weeds from sidewalks and other areas, as needed.
- Ensure staff is visible and present on the street, especially for visitors and business association members.

#### WEEKLY (AND/OR AS NEEDED):

- Recycling and Organics disposal at the proper facilities.
- Clean corners, steps, and drains at amenity plazas and bus stops.
- Sweep bus stops, wipe down street furniture and news racks.
- Maintain hanging flower baskets (Park Street).
- Installation and maintenance of seasonal decorations.
- Trim sidewalk trees.
- Power washing and steam cleaning of sidewalks and alleys. Spot power washing as needed to removes grime, gum, gum stains, and discoloration from the sidewalks and public litter cans.
- Parking lot sweeping and litter removal at the parking lot on Central Avenue located across from the Alameda Theater & Cineplex and "Parking Lot A" on Park Avenue.

#### ANNUAL/SPECIAL EVENTS:

As directed, special signage will be prepared and posted for the following special events on Park Street:

- Spring Festival, second full weekend of May (Mother's Day Weekend).
- Art & Wine Faire, last full weekend of July.
- Classic Car Show, second Saturday of October.
- Free Parking every Saturday between Thanksgiving and Christmas.

### 3.3 Overhead

In addition to the hard costs of maintaining the improvements mentioned above, the City will incur costs for staff time and expenses related to the management and maintenance of the improvements within the Zone. Staff time includes oversight and coordination of both City and contractor provided services, annual

tax roll preparation, and addressing property owner questions and concerns. These activities are directly related to the improvements, and without them the improvements could not be efficiently completed or properly maintained on an ongoing basis.

## 4. ESTIMATE OF COSTS

The estimated costs of installation, implementation and maintenance of the improvements, services and activities as described in Section 3 are outlined below. Each year, as part of the assessment levy calculation process, the costs and expenses are reviewed and the annual costs are projected for the following fiscal year.

### 4.1 Zone 4 (Park Street) Cost Estimate Budget

The estimated cost budget for Fiscal Year 2019/20 for the installation, implementation and maintenance of the improvements, services and activities is as follows:

Description	2019/20 Maximum Budget <sup>(1)</sup>
District Maintenance <sup>(2)</sup>	\$50,000.00
Landscape Maintenance	11,530.00
Irrigation – Electric	1,500.00
Irrigation – Water	7,000.00
Seasonal Decoration Installations	8,480.00
Public Litter Can Management	2,450.00
Sidewalk Pressure Washing	40,000.00
Incidental/Misc. Expenses	1,748.00
<u>Capital Improvements</u>	
Landscape Capital Improvements <sup>(3)</sup>	15,640.00
Beautification/Districtwide Improvements <sup>(4)</sup>	20,529.00
Tree Trimming and Treatment <sup>(5)</sup>	2,590.00
Accounting, Engineering & Admin Costs	13,857.48
Reserve Fund Collection	8,766.22
<u>General Benefit Contribution</u>	(5,557.79)
<b>Estimated Costs and Expenses</b>	<b>\$178,532.91</b>
<b>Total Benefit Points</b>	<b>1,820.66</b>
<b>Maximum Assessment Per Benefit Point<sup>(6)</sup></b>	<b>\$98.06</b>

(1) Actual total amounts may vary slightly due to rounding and changes in total Benefit Points.

(2) Includes litter and debris clean up on sidewalks and graffiti removal.

(3) Maintenance will occur every five years (includes demolition, irrigation, and new plantings)

(4) Ongoing yearly costs to support various beautification improvements.

(5) Maintenance will occur every five years, annual treatment cost of \$4,930 included in landscape maintenance.

(6) Beginning in Fiscal Year 2020/21 the maximum assessment will be increased by the change in the Consumer Price Index as described in Section 7.5 of this Report.

## 5. SPECIAL AND GENERAL BENEFIT

---

The improvements proposed in Section 3 are expected to confer certain special benefits to parcels within the Zone. The special benefits are described below.

### 5.1 Introduction

Pursuant to Article XIID, all parcels that receive a special benefit conferred upon them as a result of the installation, implementation and maintenance of the improvements, services and activities shall be identified, and the proportionate special benefit derived by each identified parcel shall be determined in relationship to the entire costs of the installation, implementation and maintenance of the improvements, services and activities.

Article XIID, Section 4(a) of the California Constitution limits the amount of any assessment to the proportional special benefit conferred on the property. Proposition 218 requires that the City separate the general benefit from special benefit, so that only special benefit may be assessed to properties within the Zone. Furthermore, Article XIID also provides that publicly owned properties must be assessed unless there is clear and convincing evidence that those properties receive no special benefit from the assessment.

### 5.2 Identification of Benefit

The Park Street Pedestrian Districts are considered a high-priority in the City's Pedestrian Plan, representing their importance to the community as an area of pedestrian needs. These areas are designated as pedestrian districts/corridors due in part to their mix of land uses that encourage walking (Pedestrian Plan, 2009). In addition to providing a basic transportation route, sidewalks and pathways that are kept clean and free of litter and graffiti create appealing public spaces that reflect community pride and invite people to walk.

Landscaping was installed along the roadways and sidewalks within the Zone in order to enhance the overall visual appearance for adjacent parcels. According to City staff, this includes ground cover, turf and mulch. Trees and shrubs were included as part of the landscaping as well as sprinkler, irrigation and drainage systems. In addition, aesthetically pleasing landscaping welcomes users to walkways, and street and shade tree canopies encourages use even during the hottest times of the year. According to the City's Master Street Tree Plan (2009), street trees are one of the key factors making Alameda a desirable place to shop, work, visit, and live.

The ongoing maintenance, servicing and operation of the Zone's improvements, services, and activities will provide benefits to both those properties within the Zone boundaries and to the community as a whole. The benefit conferred to property within the Zone can be grouped into three primary benefit categories; aesthetic benefit, safety benefit and economic activity benefit. The three District benefit categories are further expanded upon in each section below.

### 5.2.1 AESTHETIC BENEFIT

The aesthetic benefit relates to the increase in the overall aesthetics as a result of the ongoing maintenance, servicing and operation of the improvements, services and activities provided to the Zone. The sidewalk services, trash services, graffiti abatement, and beautification activities will enhance the overall image and desirability of the properties within the Zone. The following aesthetic benefits will be provided as a result of the improvements, services and activities in the Zone:

- Maintained sidewalks will enhance the identity of the area, which will lead to a stronger and healthier corridor. The overall appeal of the Zone is enhanced when improvements are in place and kept in a healthy and satisfactory condition. Conversely, appeal decreases when improvements are not well-maintained, unsafe, or destroyed by the elements or vandalism.
- Street landscaping improvements improve the “livability”, commercial activity, appearance and desirability for properties within the Zone. Regular maintenance ensures that the improvements do not reach a state of deterioration or disrepair so as to be materially detrimental to properties adjacent to or in close proximity to the improvements within the Zone.
- Litter removal and graffiti abatement are important for the aesthetics and preservation of community property and the well-being of the public.
- Uniform and well-maintained improvements, services and activities will create cohesion throughout the zone. This cohesion will enhance the retail and residential experience as well as encourage maximum use of building and lot area. A uniform maintenance management program will allow for consistent and reliable maintenance throughout the boundary of the Zone.
- Upgraded sidewalk amenities and other improvements, services and activities will enhance the appearance, desirability and “livability” of the property directly fronting the improvements provided throughout the Zone.

As a result of the Aesthetic benefit conferred by the continued maintenance of the improvements, services and activities, the overall “livability” of the Zone will increase. “Livability” encompasses several qualities and characteristics that are unique to a specific area. The Victoria Transport Policy Institute (VTPI, 2011) expands on the concept of “livability” and the various benefits associated with that designation. The Victoria Transport Policy Institute indicates that the “livability” of an area increases property desirability and business activity. “Livability” is largely affected by conditions in the public realm, places where people naturally interact with each other and their community, including streets, parks, transportation terminals and other public facilities. “Livability” also refers to the environmental and social quality of an area as perceived by employees, customers and visitors. This includes local environmental conditions, the quality of social interactions, opportunities for recreation and entertainment, aesthetics, and existence of unique cultural and environmental resources.

### 5.2.2 SAFETY BENEFIT

The maintained improvements within the Zone will provide an increased level of safety to the property, businesses, residents, and visitors to the Zone.

The following safety benefits will be provided as a result of the improvements, services and activities in the Zone:

- The improvements, services and activities will provide for clear and safe access to and from properties, as well as provide for safe pedestrian passage throughout the Zone.
- Well-maintained sidewalks, free of trash, provide a separation between vehicle and pedestrian as well as property and pedestrian, which provides a safety benefit for both property and pedestrian. In the City of Alameda between 2002 and 2007 there were an average of 40 pedestrian-involved motor vehicle collisions per year and pedestrian-involved motor vehicle collisions equaled five percent of total collisions (Pedestrian Plan, 2009). The U.S. Department of Transportation Federal Highway Administration (FHWA, n.d.) notes that roadways without sidewalks are more than twice as likely to have pedestrian involved accidents compared to sites with sidewalks on both sides of the street.
- Regular maintenance to the Zone improvements ensures that the improvements do not reach a state of deterioration or disrepair so as to be materially detrimental to properties adjacent to or in close proximity to the sidewalks.
- Safety for pedestrians involves not only a degree of protection from vehicular accidents, but also from criminal activity. Well monitored areas mitigate crime, especially vandalism, and enhance pedestrian safety.
- Landscape improvements not only decrease in crash rates 46 percent across urban arterial and highway sites, there is also less graffiti, vandalism, and littering in outdoor spaces with natural landscapes than in comparable plant-less spaces (Wolf, 2010).
- According to the National Crime Prevention Council (NCPC, 2009) a climate of safety in a community can be created by designing a physical environment that positively influences human behavior and prevents crime. Picking up trash and the removal of graffiti deters crime and promotes more vibrant communities.

### 5.2.3 ECONOMIC ACTIVITY BENEFIT

The economic activity benefit relates to the increase in the Zone's economic activity and future property development potential as a result of the Zone's improvements, services and activities. The economic activity for property within the Zone can best be described as the ability for the property within the Zone to develop, redevelop and operate at the property's highest and best use.

Properties within the Zone will receive the following economic activity benefits as a result of the Zone's improvements, services and activities:

- Provide a cleaner more inviting environment to residents and consumers which will attract, retain and expand the retail and business climate throughout the Zone.
- The effort will reduce vacancy rates and increase lease rates and utilization of property within the Zone.

- Well-maintained and safe Zone areas will encourage an increase in the overall pedestrian activity.
- The area will become more pedestrian friendly, thus improving the retail environment by encouraging individuals to shop, dine, and stay within the Zone boundaries.
- Well maintained street landscape improvements not only make adjacent properties appear more stable and prosperous but can spur investment in the property. According to the FHWA, landscaped sidewalks create an inviting place for customers to shop and do business (FHWA, 2001).

Well-maintained and safe sidewalks and public right-of-ways not only make adjacent properties appear more stable and prosperous, but can spur investment in the property. The National Complete Streets Coalition (NCSC, n.d.) notes that street design that is inclusive of all modes of transportation, where appropriate, not only improves conditions for existing businesses, but also is a proven method for revitalizing an area and attracting new development. Washington, DC's Barracks Row was experiencing a steady decline of commercial activity due to uninviting sidewalks, lack of streetlights, and speeding traffic. After many design improvements, which included new patterned sidewalks, more efficient public parking, and new traffic signals, Barrack's Row attracted 44 new businesses and 200 new jobs. Economic activity on this three-quarter mile strip (measured by sales, employees, and number of pedestrians) has more than tripled since the inception of the project.

### **5.3 Separation of General Benefit**

Section 4 of Article XIID of the California Constitution provides that once a local agency which proposes to impose assessments on property has identified those parcels that will have special benefits conferred upon them and upon which an assessment will be imposed, the local agency must next "separate the general benefits from the special benefits conferred," and only the special benefits can be included in the amount of the assessments imposed.

General benefit is an overall and similar benefit to the public at large resulting from the installation, implementation and maintenance of the Zone's improvements, services and activities to be provided by the assessments levied. The installation, implementation and maintenance of assessment funded Zone improvements, services and activities provided by the Zone will be located within the Zone boundaries only. There will be no installation, implementation and maintenance of assessment funded improvements, services and activities located outside of the Zone boundaries.

The ongoing installation, implementation and maintenance of Zone improvements, services and activities will provide aesthetic, safety and economic activity benefits to the property within the Zone. However, it is recognized that the ongoing installation, implementation and maintenance of Zone improvements, services and activities will also provide a level of benefit to some property and businesses within proximity to the Zone, as well as visitors and individuals passing through the Zone. Pedestrian traffic from property within and outside of the Zone as well as individuals passing through the Zone area will be able to utilize the safe and maintained sidewalks to not only access

property located within the Zone, but also to access public transportation at the bus stops within the Zone. Therefore, the general benefit created as a result of the Zone's improvements, services and activities has been considered.

## **5.4 Quantification of General Benefit**

As a result of the maintenance and operation of the improvements, there will be a level of general benefit to people that do not live in or intend to conduct business within the Zone. In order for property within the Zone to be assessed only for that portion of special benefits received from the Zone's maintenance activities, general benefits provided by the ongoing maintenance of the improvements needs to be quantified. The amount of general benefit that is provided from the Zone's maintenance activities cannot be funded via property owners' assessments.

There will be pedestrian traffic generated from property outside of the Zone that will utilize the maintained sidewalks in order to pass through the Zone and access property located outside of the Zone boundaries. In addition to accessing property located outside of the Zone, there will also be a level of pedestrian activity that will utilize the maintained sidewalks for leisure and fitness activities. Pedestrians will incorporate the maintained and safe sidewalks into their leisure and fitness routines, thus making the Zone sidewalks serve as a pass through portion of their overall route traveled. The benefit provided to property and pedestrians, as a result of the maintained sidewalks serving as a pass through corridor, needs to be quantified.

The Zone encompasses the Park Street Business District, which offers shopping and dining experiences, professional services, and fun things to do including: car shows, music festivals, art faires, holiday festivities, theaters and the Cineplex.

The primary reason persons living outside the Zone would enter the Zone would be to access the commercial or entertainment properties within the Zone. The Park Street business district is on the City's primary commercial and entertainment districts. Even those individuals looking to use public transportation for the purpose of commuting out of Alameda will likely shop or dine in the Zone. Additionally, the presence of the improvements will act as a magnet to tourists or commuters traveling to the City who would otherwise just pass-through the areas.

While the improvements within the Zone are primarily a benefit to the properties within the Zone we must recognize the benefit received by those individuals just that may be just passing through with no intentions of utilizing the properties within the Zone. It is possible that people living in the neighborhoods around the Zone will walk into the Zone strictly for the purpose of commuting to work in a location outside the Zone.

The U.S. Census Bureau (2017) determined that there is an average of 2.52 persons per household in Alameda. The commonly accepted distance people will walk for public transportation, goods and services is one-quarter mile (Walkscore, 2014). In order to determine the total number of persons who are within close proximity to the improvements, a quarter-mile radius of the Zone's boundary.

Number of Households <sup>(1)</sup>	Neighborhood Population
1,916	4,836

(1) Based upon land use and units from the 2018 Alameda County Secured Property Roll.

According to the City's Pedestrian Plan, approximately 16 percent of Alameda's employed residents utilize public transit to commute to work (Pedestrian Plan, 2009). In order to determine the number of persons that will enter the Zone walking with a purpose to access public transit for their commute to work in a location outside the Zone, the employed population of residents must be determined. If it is assumed that at least 1 person per household will be employed accounting for small children, retired, and unemployed residents, the number of households is equal to the employed population. To find the number of persons utilizing public transit for their commute, 16 percent is applied to the employed population residing within a quarter-mile radius of the Zone boundaries.

Employed Population	Population Estimated to Commute to Work
1,916	307

After applying 16 percent to the number of employed residents within a quarter-mile of the Zone, the result is that an estimated 6.5 percent of the people residing in the areas surrounding the Zone will commute to work utilizing public transit.

Neighborhood Population <sup>(1)</sup>	Population Estimated to Commute to Work <sup>(2)</sup>	Percent of Neighborhood Population Commuting <sup>(3)</sup>
4,836	307	6.35%

- (1) Estimate of households within a quarter-mile radius of the Zone multiplied by the 2.52 persons per household according to the 2017 U.S. Census.
- (2) Estimated commuters assuming a minimum of 1 employed person per household within a quarter-mile radius of the Zone.
- (3) Percent of employed persons estimated to use public transit to commute to work.

It is likely that many of those people will utilize the commercial, dining and entertainment services within the Zone on the way to and from the use of public transit. However, if we use a very conservative estimate that 50 percent of those commuters will never utilize the shops, restaurants or services provided by the properties within the Zone and will only ever pass through the Zone, then we can assume 3.17 percent of the surrounding populations will receive benefit from the improvements, and is therefore considered to be general benefit.

General Benefit
3.17%

As such, the general benefit portion of the improved aesthetics, increase safety, and economic activity benefits resulting from improvements within the Zone is estimated to be 3.17 percent and the special benefit is estimated to be 96.83 percent.

## 6. APPORTIONING OF SPECIAL BENEFIT

As described in the Introduction, once special benefits are identified, they must be assigned based on the estimated proportionate special benefit derived by each parcel. This section describes the assignment of special benefit to each parcel.

### 6.1 Parcel Characteristics

The method of apportioning benefit to parcels within the Zone reflects the proportional special benefit assigned to each property from the Zone's improvements, services and activities based upon the various property characteristics for each parcel as compared to other properties within the Zone.

The following parcel characteristics are used to determine each parcel's proportionate special benefit:

- Lot square footage
- Building square footage
- Linear frontage

It is believed parcels of the same use will experience different degrees of special benefit in relation to differences in their lot size, building size, and linear frontage. For example, a parcel with a large building will experience greater special benefit than a parcel with a small building. Accordingly, as lot size, building size, and linear frontage increase, parcels are considered to receive proportionately greater special benefit. Therefore, these parcel characteristics are deemed appropriate factors for determining proportional special benefit.

In order to relate differing parcel characteristics to one another, a relative factor is determined for each.

#### 6.1.1 LOT FACTOR

The average lot size in Zone 4 is approximately 9,783 square feet. Each parcel's actual lot size was divided by Zone 4's average lot size to determine a Lot Factor.

Parcel's Lot Sq Ft	/	Zone 4 Average Lot Sq Ft	=	Parcel's Lot Factor
-----------------------	---	--------------------------------	---	------------------------

#### 6.1.2 BUILDING FACTOR

The average building size in Zone 4 is approximately 6,066 square feet. Each parcel's actual building size was divided by Zone 4's average building size to determine a Building Factor.

Parcel's <b>Building Sq Ft</b>	/	Zone 4's Average <b>Building Sq Ft</b>	=	Parcel's <b>Building Factor</b>
-----------------------------------	---	--	---	------------------------------------

### 6.1.3 FRONTAGE FACTOR

The average linear frontage in Zone 4 is approximately 75.74 feet. Each parcel's actual linear frontage was divided by the Zone's average linear frontage to determine a Frontage Factor.

Parcel's <b>Frontage Ft</b>	/	Zone 4's Average <b>Frontage Ft</b>	=	Parcel's <b>Frontage Factor</b>
--------------------------------	---	---	---	------------------------------------

## 6.2 Land Use Types

In addition to lot size, building size, and linear frontage, a parcel's land use type will also affect the special benefits received. Following the calculation of each parcel characteristic factor, Land Use Benefit Points were assigned. These benefit points correspond to the special benefits described in Section 6.

Each parcel within the proposed District is assigned a land use type for purposes of determining the special benefits received. Below is a description of the land use type categories to be assessed within the proposed District.

- **Non-Residential Property:** Non-Residential Property consists of parcels owned by a profit-making entity (rather than by a government or non-profit entity) and used for commercial purposes such as retail, office, hotel property, or paid parking lot. Properties that have residential units but have a primary commercial use are also considered Non-Residential Property.
- **Parking Lot Property:** Parking lot properties consist of parking lots that serve a neighboring residential or non-residential property. The intended use is not as a commercial parking lot or structure and as such does not receive economic benefit.
- **Residential Property:** Residential Property consists of single family dwellings, duplexes, triplexes, condominiums, and apartment units used exclusively for residential purposes.
- **Public Property:** Public Property consists of parcels owned by a state, regional, or city government entity; for example, police or fire stations, schools, libraries and government-owned office buildings. Non-Profit properties such as churches have a similar use and traffic pattern as Public Property and therefore have equivalent benefit factors to property classified as Public.
- **Special Use Property:** There is a church property and two non-profit organizations, Masonic Hall Association of Alameda and Fraternal Order of Eagles that are similar in usage and traffic pattern to Public Property and will therefore be included into the Public Property category for the purpose of assigning special benefit. Should ownership and or land use change, the classification of the property will be changed accordingly.

- **Exempt Property:** There are three parking lots that are included as part of the improvements and are therefore exempt from the assessment as they do not receive special benefit. Additionally, there is one common area parcel that is exempt due to the surrounding residential parcels being assessed individually.

By adjusting the assigned special benefit points assigned for each property land use category based on parcel characteristics, a more complete picture of the proportional special benefits received by each parcel within the Zone is presented.

### 6.2.1 LAND USE BENEFIT POINT SUMMARY

The table below summarizes the Land Use Benefit Points:

Property Land Use	Aesthetic Benefit Points	Safety Benefit Points	Economic Activity Benefit Points	Total Land Use Benefit Points
Non-Residential Property	1.00	1.00	1.00	<b>3.00</b>
Parking Lot	1.00	1.00	0.00	<b>2.00</b>
Residential	0.25	0.25	0.25	<b>0.75</b>
Public Property	0.25	0.25	0.25	<b>0.75</b>

### 6.3 Total Benefit Points

The calculation of Total Benefit Points for each parcel takes into account each component analyzed and described above, parcel characteristics and land use. The formula for determining each parcel's Total Benefit Points is as follows:

(	Lot Factor	+	Building Factor	+	Frontage Factor	)	X	Land Use Benefit Points	=	Total Benefit Points
---	------------	---	-----------------	---	-----------------	---	---	-------------------------	---	----------------------

The Total Benefit Points computed for each parcel in Zone 4 are 1,820.66.

### 6.4 Data Considerations and Parcel Changes

The use of the latest Assessor's Secured Roll information has been and shall be used in the future as the basis in determining each parcel's land use, lot square footage, building square footage and linear street frontage unless better data was or is available to the City. In addition, if any parcel within the Zone is determined by the Assessment Roll to be an invalid parcel number, the land use, lot square footage, building square footage and linear street frontage of the subsequent valid parcels shall serve as the basis in assigning special benefit points.

## 7. METHOD OF ASSESSMENT

### 7.1 Assessment Budget

In order to assess the parcels within the Zone for the special benefits received from the ongoing Zone improvements, services and activities, the general and special benefits must be separated. As previously quantified in Section 5.4 of this Engineer's Report, the general benefit received from the Zone improvements, services and activities is 3.17%. Accordingly, 96.83% of the benefits from the Zone improvements, services and activities are considered to provide special benefits to the properties within the Zone and thus could be subject to assessment therein.

Below is the calculation for the assessments utilizing the proposed Fiscal Year 2019/20 cost estimate.

#### Zone 4 (Park Street)

Description of Assessment Amount	Amount <sup>(1)</sup>
Total 2019/20 Zone Improvements, Services and Activities Cost Estimate	\$184,090.70
Less: General Benefit Contribution	(5,557.79)
<b>Total 2019/20 Maximum Assessment</b>	<b>\$178,532.91</b>
Total Zone 4 Benefit Points	<b>1,820.66</b>
2019/20 Assessment Per Benefit Point	<b>\$98.06</b>

(1) Actual total amounts may vary due to rounding.

### 7.2 Maximum Assessment Rate per Special Benefit Point

The maximum assessment rate per special benefit point is calculated by dividing the total cost estimate by the total special benefit points assigned. The following formula provides the maximum assessment rate per special benefit point calculation:

**Total 2019/20 Cost Estimate / Total Special Benefit Points =**

**Maximum Assessment Rate per Special Benefit Point**

$\$178,532.91 / 1,820.66 = \$98.06$

Each parcel's actual assessment is determined by multiplying the actual assessment rate by the parcels total special benefit points. If the total special benefit points change in future years, the maximum allowable annual assessment rate will not be recalculated. The maximum allowable annual assessment rate, plus the annual cost of living inflator, will remain fixed. The actual annual assessment rate will be calculated by dividing the fiscal year's net cost estimate to be assessed by the fiscal year's total special benefit points, not to exceed the maximum allowable annual assessment rate for that fiscal year.

The individual assessments are shown on the assessment roll in Section 9 of this Engineer's Report.

### 7.3 Method of Assessment Spread

The method of assessment is based upon a formula that assigns the special benefits to each parcel, with special benefit points being adjusted by the parcel characteristics and land use as described in Section 6. The formula bellows provides a summary of the annual assessment calculation for each parcel in the Zone.

(	(A) Lot Factor	+	(B) Building Factor	+	(C) Frontage Factor	)	X	(D) Parcel's Land Use Benefit Points	=	(E) Parcel's Total Benefit Points
---	----------------------	---	---------------------------	---	---------------------------	---	---	---	---	---

Parcel's Aesthetic Benefit Points	+	Parcel's Safety Benefit Points	+	Parcel's Economic Activity Benefit Points	=	(D) Parcel's Land Use Benefit Points
---	---	--------------------------------------	---	--	---	---

Parcel's Lot Sq Ft	/	Zone 4's Average Lot Sq Ft	=	(A) Lot Factor
Parcel's Building Sq Ft	/	Zone 4's Average Building Sq Ft	=	(B) Building Factor
Parcel's Linear Frontage	/	Zone 4's Average Frontage Sq Ft	=	(C) Frontage Factor

### 7.4 Applying the Method of Assessment Spread

The maximum assessment for each parcel in the Zone has been calculated by the following procedure:

**Step 1:** Assign each parcel its appropriate land use category based on the most recent Alameda County Assessor's Secured Roll data.

**Step 2:** Determine each parcel's land use benefit points based on the following table:

Property Land Use	Aesthetic Benefit Points	Safety Benefit Points	Economic Activity Benefit Points	Total Land Use Benefit Points
Non-Residential Property	1.00	1.00	1.00	<b>3.00</b>
Parking Lot	1.00	1.00	0.00	<b>2.00</b>
Residential	0.25	0.25	0.25	<b>0.75</b>
Public Property	0.25	0.25	0.25	<b>0.75</b>

**Step 3:** Sum the aesthetic benefit points, safety benefit points and economic benefit points for each parcel.

**Step 4:** Determine the appropriate lot factor, building factor and frontage factor based on the parcel's location to the improvements. The unit of measurement for each factor is shown in the following table:

Lot Factor	=	Parcel's Assigned Lot Square Footage
Building Factor	=	Parcel's Assigned Building Square Footage
Frontage Factor	=	Parcel's Assigned Linear Street Frontage

**Step 5:** Multiply the total land use benefit points by the sum of lot factor, building factor and frontage factor to compute each parcel's total benefit points.

**Step 6:** Sum the result of Step 5 for all parcels

**Step 7:** Separate the general benefit from the special benefit by multiplying the total Zone budget times the special benefit percentage.

**Step 8:** Divide the portion of the budget representing special benefit calculated in Step 7 by the result of Step 6 to compute the rate per special benefit point.

**Step 9:** Multiply each parcel's total benefit points by the result of Step 8 to compute each parcel's assessment.

**Step 10:** In future years the rate per special benefit point will be adjusted by inflation. The maximum assessment amount is subject to an annual adjustment, in which the maximum assessment shall be increased by the percentage change in the February to February U.S. Department of Labor, Bureau of Labor Statistics Consumer Price Index for all Urban Consumers (CPI-U): San Francisco-Oakland-Hayward each fiscal year.

## 7.5 Cost of Living Inflator

Each fiscal year beginning Fiscal Year 2020/21, the maximum allowable assessment amount may be increased by the annual percentage change in the February to February Consumer Price Index for all Urban Consumers, for the San Francisco-Oakland-Hayward area ("CPI") up to a maximum of 3.0% each fiscal year. If for any reason the percentage change is negative the maximum allowable assessment would not be decreased by reason of such negative percentage change and would remain at the amount as computed on the previous fiscal year regardless of any CPI adjustment. The annual assessment cannot exceed the actual costs to operate the Zone in any given year.

## 8. ASSESSMENT DIAGRAM

---

An Assessment Diagram for the Zone is shown on the following pages. The lines and dimensions of each lot or parcel within the Zone are those lines and dimensions shown on the maps of the Assessor, at the time this report was prepared, and are incorporated by reference herein and made part of this Engineer's Report.
