City of Alameda Code No. 7711 Approved by C.S.B.

## ELECTRICAL EQUIPMENT SUPERINTENDENT

## DEFINITION

Under general direction, plans, organize, supervise, and manage the work of operational groups engaged in the <u>construction</u>, operation, and maintenance of electrical <u>substations</u>, electrical equipment, and meters as well as system <u>control and dispatch functions</u>. Perform other related work as required.

## **DISTINGUISHING FEATURES**

This is a single-position, mid-management level classification responsible for the supervision and management of the electrical maintenance and system control sections of the Engineering and Operations Division in the Alameda Municipal Power Department (AMP). Work in the class is distinguished from that of lower classes by the overall responsibility for major and/or complex projects or assignments, by the level and extent of management, administrative, and supervisory responsibilities, and by the level of professional specialization and expertise required.

## EXAMPLES OF DUTIES

- Supervise, train, evaluate, and oversee training of assigned staff; conduct performance evaluations, recommend disciplinary procedures as required; and develop and ensure continued compliance of goals, objectives, policies, procedures, and practices for assigned sections.
- Plan, organize, and direct the following functions: the transmission and distribution system controls and dispatch; the installation, calibration, testing, servicing and repair of electrical equipment, meters, substation equipment; SCADA system and radio communication system operation and maintenance; and the operation, maintenance and construction of substations.
- 3. Provide technical expertise and serve as a liaison role to other divisions, departments, and external agencies; coordinate operation and maintenance of the Northern California Power Agency's combustion turbine located in Alameda; coordinate switching activities on the transmission and distribution systems with personnel, customers and power suppliers; supervise the planning and implementation of switching orders to provide clearances for dispatch operations and field personnel; respond to public concerns and complaints and ensure they are handled promptly and professionally.
- 4. Implement and ensure applicable regulatory compliance requirements are being met, including North American Electric Reliability Corporation (NERC)/Western Electricity Coordinating Council (WECC)/Federal Energy Regulatory Commission (FERC) compliance and take proactive action to address issues.
- 5. Assess substation reliability and recommend solutions to address deficiencies; develop and implement plans to acquire and integrate solutions that enhance safe and reliable power delivery; maintain a balanced system; and investigate system problems and make recommendations for corrective action.
- 6. Ensure adherence to and application of established safe work practices and procedures; and ensure the continuous safe and timely response to electric system emergencies by dispatch, system control, and field service personnel.
- Review construction drawings and coordinate related work and materials; prepare plans, drawings, specifications\* and estimate metering installations; and schedule and oversee work of contractors.
- Prepare various studies and reports regarding the use of equipment, work methods, materials, services and administrative improvements; and maintain logs and reporting functions, such as outage reports, system abnormal reports, and project status reports.
- 9. Prepare and administer section budgets; and administer equipment and supply procurement request activities.
