Re: **Contract Amendment for Engineering Design Services**  
Alameda Cyclic 17 Sewer Replacement Project

Dear Ms. Smith:

Nute Engineering is pleased to submit this proposal for a Contract Amendment to provide engineering design services and construction services for the Alameda Cyclic 17 Sewer Replacement Project (Cyclic 17). Our review of the sewer pipes (Attachment C) selected for 2019-20 shows that the project consists of the rehabilitation of 17,519 linear feet of sewer mains, including laterals, manholes and all appurtenances, ranging from 6" diameter to 12" diameter pipe.

The sewers included in Cyclic 17 include a combination of sewers in roadways and easement sewers. Easement sewers in Alameda are known to be challenging due to access issues and the presence of trees and structures constructed in the easements. Nute Engineering will assist the City to send out notices to each parcel so they can be investigated in the field and evaluated for construction constraints. Coordination will also be required to provide access for the surveyor to capture sewer structures. Our firm will also provide support to send right-of-entry agreements to the parcels for the construction work upon request. A public meeting for houses serviced by easement sewers will be held if deemed necessary.

The Lincoln Avenue sewer will require special planning and consideration. The sewer main runs through one of the more congested areas in the City including pass the police station. Fortunately, the Lincoln Avenue is wide and existing sewer main is located on the north side of Lincoln Avenue provided more flexibility to maintain traffic flow during construction.

Park Avenue is also one of the busiest commercial corridors in Alameda and has been added to this project at the request of City maintenance staff due to observed pipe conditional issues. Street parking will likely have to be restricted during construction necessitating public outreach and notification to business prior to construction. Various sewer rehabilitation methods will be evaluated to minimize the impacts to this area and shorten the duration of construction.

It is understood that the Cyclic 17 project may be completed by Ranger Pipelines, Inc., whom have been awarded the Cyclic 16 Construction Contract, through an optional Contract Amendment, or will be awarded through a public bidding process. Our firm will provide engineering services to accommodate either of these options.
