Council,

Please end the slow street program. It causes the intersections to be very dangerous. It seems to be meant to get people to practice recreation in the streets -which people should not do. I think that we all know this, I tell my children constantly. I have seen no decrease in traffic sufficient to make the streets safer for any purpose.

If you won't end the program, at least rotate the streets. I'm on San Jose, which always has cars coming and going. A lot of people and their cars live on the street without even considering through traffic. This was a well-meaning experiment, but in fact has caused dangerous hazards and messages on my street. Please end it.

Thank you,
Bradley King
