Subject: Request for Informational Report to Open Government Commission

Request for Information Report concerning Disclosure of Documents

I'm writing to request an Informational Report to the Open Government Commission regarding the "Disclosure of Documents That Have Been Determined to be Public After Previously Determined as Unavailable to the Public."

The Sunshine Ordinance 2.91-12(e) states:

The City Attorney's office shall prepare and present on the City Council Consent Calendar, a list of documents which have been determined to be public after previously being determined to be unavailable to the public. This list shall be presented at least semi-annually and available on the City's website.

A similar report was previously shared with the OGC in February 2016. In light of both staff changes with the City Attorney's Office, City staff for the Commission, and a completely brand new commission, it may be helpful to provide current commissioners with this information.

Additionally, please inform us how state laws like AB1421 and AB 748 have changed City requirements for disclosure. Also, please let the Commission know where on the City website this information is available.

Thank you.
