---

Could someone in the clerks office add this public comment on to item 7-A for Monday night?

Thank you!

Andrew Thomas, planning and building Director.

Alameda planning board members, I live in the three hundred block of Taylor Ave. which is about one and one half blocks from this project, I walk past these buildings almost daily and have for over 10 years. it started out in the testing building and then enlarged to the big overhaul and repair building, I have never been concerned about air quality when I walk because I never have encountered any odors coming from the project. I have seen vapor (like steam) coming off of the test stand but it disappears

before it is off the site. as for noise there is none that I have heard, I usually walk between 10am and about 3pm. this site provides plenty of parking off the city streets and is a very important part of what is happening at Alameda Point.

we  
really need this type of clean business and the re-use of these old very large buildings at Alameda point.

John Piziali, former planning board  
member, (from a  
long time ago)
